Date Repaid[1]:	03/11/2013	State:	Florida

[1]If repayment was incremental, please enter the most recent repayment date.

American taxpayers are quite interested in knowing how banks have used the money that Treasury has invested under the Capital Purchase Program (CPP) and Community Development Capital Initiative (CDCI). To answer that question, Treasury is seeking responses that describe generally how the CPP/CDCI investment has affected the operation of your business. We understand that once received, the cash associated with TARP funding is indistinguishable from other cash sources, unless the funds were segregated, and therefore it may not be feasible to identify precisely how the CPP/CDCI investment was deployed or how many CPP/CDCI dollars were allocated to each use. Nevertheless, we ask you to provide as much information as you can about how you have used the capital Treasury has provided, and how your uses of that capital have changed over time. Treasury will be pairing this survey with a summary of certain balance sheet and other financial data from your institution's regulatory filings, so to the extent you find it helpful to do so, please feel free to refer to your institution's quarterly call reports to illustrate your answers. This is your opportunity to speak to the taxpayers in your own words, which will be posted on our website.

What specific ways did your institution utilize CPP/CDCI capital? Check all that apply and elaborate as appropriate, especially if the uses have shifted over time. Your responses should reflect actions taken over the past year (or for the portion of the year in which CPP/CDCI funds were outstanding).

☒	Increase lending or reduce lending less than otherwise would have occurred.	Since the begining of the TARP period to the end of the TARP period, the additional allowed the Bank to maintain satisfactory capital ratios while significantly making single family residential mortgage loans to consumers and SBA loans to small businesses.
☒	To the extent the funds supported increased lending, please describe the major type of loans, if possible (residential mortgage loans, commercial mortgage loans, small business loans, etc.).	Predominantly all of the increased lending were residential mortgage loans and SBA loans.
☐	Increase securities purchased (ABS, MBS, etc.).	

☐	Make other investments	
☒	Increase reserves for non-performing assets	In the early TARP years the CPP was used to help support increased Loan Loss reserves, however in subsequent years earnings supported credit quality issues.
☐	Reduce borrowings	
☐	Increase charge-offs	
☐	Purchase another financial institution or purchase assets from another financial institution	
☐	Held as non-leveraged increase to total capital	

What actions were you able to avoid because of the capital infusion of CPP/CDCI funds?

The Bank was able to continue to make first mortgage residential loans and loans to small businesses without having to shrink its balance sheet.

What actions were you able to take that you may not have taken without the capital infusion of CPP/CDCI funds?

As stated previously, the Bank was able to increase the volume of residential mortgage and small business lending.

Please describe any other actions that you were able to undertake with the capital infusion of CPP/CDCI funds.

According to the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number. The valid OMB control number for this information collection is 1505-0222. The time required to complete this information collection is estimated to average 80 hours per response.
