Zoning

Camp Easter Seal

The purpose of the “RR-2” district is to provide for small acreage homesites outside of Urban Growth Boundaries, where a moderate intensity of land development is appropriate, but where urban services and facilities may not be available or necessary. The “RR-2” district provides for continued existence of rural family life and to provide a transition of densities between urban development and exclusive agricultural and forestry uses. Our subject was previously zoned F and its use was grandfathered, but the zoning was changed in 1999 to RR-2.

Flood Zone

The following Federal Emergency Management Agency Community Panels Number 41011C0075D, dated September 25, 2009 and 41011C0032D, dated September 25, 2009 have it as an A Zone as a Base Flood Elevation for the lake and around the lake. The camp is out of the flood plain. The base flood has a 1% chance of being equaled or exceeded in any given year. The maps are found on the next page.
Area Data

The subject property is located in Coos County. Coos Bay and North Bend abuts each other in Northern Coos County, and form the Bay Area Community. The Bay Area is situated along the Oregon Coastal Highway (Route 101). Together, these two communities form the largest metropolitan area on the Oregon Coast. The twin city Bay Area is a forest product and tourism/recreation based, lower-to-middle income region located on the Southern Oregon Coast, Coos County, Oregon.

The local economy has improved in the last two decades since the recessionary forces affecting timber harvesting caused a deep drop in real estate prices. With the immigration of seniors, unemployment rates have been reduced, as non-manufacturing employment opportunities replaced positions displaced in the manufacturing sector. Recent population figures show an estimated 63,210 in Coos County, up from the 1990 census figure of 60,273. Coos Bay has a population of 16,670 while North Bend has 9,855 residents, according to Portland State University.

The Mill Casino and Resort has taken over one of the closed mill sites and has built an Indian gambling resort. The construction of the Scottish links golf courses 25 miles to the South, just north of Bandon, by Michael Keiser out of Chicago, has led to a lot of new interest in this area. Four Scottish links golf courses, and an extensive practice facility, have already been developed five miles to the north of Bandon. The resort is one of our largest employers with close to 450 employees plus several hundred caddies during the peak summer months. Mr. Keiser has put more than $100,000,000 into this development, which has drawn national and international attention.

The North Bend Airport Business Park negotiated construction of a large office building for a call-center facility, which has been in operation for several years. The call center service, recently purchased by Xerox, is tied to the fiber optic cable that has been brought to our community. A new larger airport terminal building and control tower at the South Coast Regional Airport was completed in 2008. The State Legislature passed a bill authorizing $20,000,000 for a new natural gas line for Coos County from the I-5 corridor, subject to voter approval, which passed. Work is now complete and working line has been extended under the bay to the North Spit.

The area's economy shows positive economic signals. Although there have been mill closures in the past, there are now solid industrial prospects. There has been additional semi-intense new retail development. Wal-Mart acquired the lands to the east of their original store for over $1.5 million dollars and developed a Wal-Mart Superstore on Newmark Avenue. Staples spent $532,500 for a lot on the west side of Wal-Mart and built their store there. These developments are across the street from SOCC, the local 2-year college. Newmark Street has undergone a widening project that significantly improved the traffic flow and access to all properties in this area.

Oregon Resources will soon be opening the old Glenbrook Nickel Site in the South Coos Bay area. They will invest over $30 million and employ over 40 people. In addition, if the Jordon Cove LNG facility is approved, it will bring $900 million in investment and employ more than 70 people. In 2007, the CEDCO Mill Casino and Hotel plus RV Park constructed a luxury six story hotel and indoor pool with spas at the southwest corner of the Casino, reported as costing over $45 million dollars. The area economy, as a whole, should see moderate growth into the foreseeable future.
Neighborhood

The subject neighborhood is best described as the North Tenmile Lake, Tenmile Lake, and the City of Lakeside. North Tenmile Lake and Tenmile Lake offer strong recreational amenities, and are used by fisherman, boaters, and water skiers alike. Around a considerable portion of the lake is a narrow strip of residentially zoned land, with forest uses in behind. Most of the land is moderate and steeply sloped, but small inlets of bottomland exist. There are some road systems within the neighborhood, offering vehicular access to some uses and homes; other uses are boat access only. The homes tend to be average to good quality, and many are new. The lake-frontage neighborhood continues to improve, and the demand for waterfront property continues to be steady. Electricity appears to be mostly available, but public water and sewer are not, except near the City of Lakeside.

The City of Lakeside is about 15 miles North from North Bend and ten miles or so South from Winchester Bay, with Reedsport another 5 miles further to the North, all along the Highway 101 corridor. Throughout the 2000’s, the population appears to have been at a fairly constant level. Lakeside is about 2 miles East of the ocean beaches. The Western edge of the City is essentially bordered by the Oregon Dunes National Recreation Area. The Northern and Northwestern portions of Lakeside are contiguous with William M. Tugman State Park.

The City of Lakeside has seen some recent building and subdivision activity, but the population has not increased significantly. The town is fairly inactive during the winter months. It is largely composed of retirees and people who commute to the urban center of Coos Bay and North Bend. There are few successful new businesses. There are 5 or 6 restaurants or cafes in town, and all would appear to have marginal levels of business. The Bandon Dunes Golf Resort is generally considered to be the main tourist draw for Coos County, and the City of Bandon appears to have higher than normal commercial vacancies for retail space in the Old Town section at this time. Lakeside is a lesser tourist draw. The problem for any business, such as the former antique store for the former Camp Easter Seal’s Lakeside facility, is how to survive during the winter months. A restaurant use could possibly see more year-round activity. The City of Lakeside should see very slow, positive growth into the foreseeable future.

SUBJECT PROPERTY DESCRIPTION

Property Data

The total subject property is comprised of 14 different Tax Lots. The former Camp Easter Seal is located on 12 of these tax lots. All of the property covers 20.96 acres. In total there is roughly 3,000 linear feet of frontage on North Tenmile Lake. The primary access is via the water; however, access is available by road from Highway 38, 2 miles East of Reedsport, then 11 miles south over a well maintained asphalt and gravel road.

Camp Easter Seal

There are two wells, a new drain field, and electricity on the subject property. Included in the Addenda are the documents associated with the rights to water from the lake, and five Well Water Reports. Two of the wells were unsuccessful. The other three have stated capacities of 10, 7, and 3 gallons per minute. The best-flowing well is described by the Water Master’s Office as good, the 7 gallon per minute flow is considered to be average, and the third flow as poor. This well is no longer in service. The best well was dug near the ridge line and is near the gated entrance to the camp. This well has a small housing covering it. The seven
The gallon per minute well is a little lower down the hill, and it has a larger wood-walled housing. This structure appears to contain the testing equipment for collecting test samples, which is reported as occurring every three months. The three gallon per minute well is near the water tank, and it is disconnected. The actual flow is reported cut to 8 and 6 gallons per minute. The Water Master’s office in Coquille indicated that for domestic use, one is limited to 15,000 gallons per day per aquifer, and 5,000 per day for commercial uses. It is unknown, but questionable, whether the three wells represent three different aquifers.

The Coos Bay/North Bend Water Board indicated that minimum water fees are for a family’s consumption of 0 to 300 cubic feet, or 2,250 gallons per month. If one person uses 30 gallons a day, and if there were 150 staff and guests housed at the camp, 4,500 gallons would be needed per day. This is under the commercial maximum for one aquifer, and well under the 28,800 gallons per day of rated capacity for the three wells. The County has given no figure for allowed occupancy. The 150 figure is an estimate related to the use of multiple double bunk beds in the cabins, The Cottage, Old Dorm, and the Health Lodge.

The permit for lake water appears to be limited to 4.0 gallons per minute for domestic use for one family including irrigation not to exceed ½ acre lawn and non-commercial garden and domestic campground use. The Water Master’s Office stated that the indicated buildings and indicated source-point cannot be altered without a new permit. The number of buildings implies more than domestic use, but the lake-water permit does not. The water tank is indicated as being 12,000 gallons in capacity by the manager.

Access to the primary parcel is via eight miles of graveled road and 3 miles of asphalt that starts about 11 miles away, off Highway 38 to the North. The conditions are sometimes rough in winter, but generally a four-wheel vehicle is easily sufficient. Reportedly, the road will be repaired by Coos or Douglas County. There is a canal connecting North Tenmile Lake to Tenmile Lake and Lakeside.

The topography of the primary site is hilly with most of the improvements built on a 4 acre bench area on the West side. The rise from the lake to the ridge is roughly 200’. A topographical map indicates a ridge line at 200’ and the water elevation is unstated. The areas that are mainly North and East of the camp are mostly steep hillside with an area for a hiking trail along the lake. Larger conifer trees are throughout the site and form an attractive barrier alone the south side of the lake, but their value is closely tied to the attractive aesthetics of the property. In summary, the land is the most important element of the entire property.

**Improvements**

The High House was constructed in 1948. There are fourteen buildings on the property including a lodge, 5 cabins, the cottage, a staff and a guest facility, High House, 2 boat dock building, 2 storage and workshop buildings, and a pavilion. Most were constructed in the 1970’s. The boat houses were built in 2006. The primary buildings total 14,836 square feet.

Location Map
Coos County Zoning Ordinance RR-2 Rural Residential and F Forest

Section 3.080. Rural Residential Zone (RR).

Purpose of Classification. The Rural Residential Zone is designed to allow for low density residential development outside urban growth boundaries and rural communities defined by the Comprehensive Plan.

Section 3.081. Uses Permitted Outright.

The following uses and their accessory uses are permitted outright:

1. A single family dwelling or mobile home on each contiguous ownership or platted subdivision lot approved prior to August 12, 1986 or lot subsequently approved at the minimum lot size specified by this zone subject to approval of on-site sewage disposal and domestic water source by the agency regulating these facilities.

   NOTE: Comprehensive Plan policy related to Floras Lake North (RLE-1) and Floras Lake South (RLE-2) exception areas states that development in the Pacific City Town Plats will not be allowed as one dwelling unit per lot but at one dwelling per contiguous ownership subject to approval of on-site sewage disposal system and water source by the agency regulating these facilities.

2. Farming or forestry use.

Section 3.082. Conditional Uses Subject to Administrative Approval by the Director.

The following uses may be allowed provided a land use application is submitted pursuant to Section 2.060 of the Curry County Zoning Ordinance and the Planning Director approves the proposed use based upon relevant standards for review in this ordinance. Numbers in parenthesis following the uses indicate the standards described in Section 7.040 that must be met to approve the use.

1. Home occupation. (7)

2. Trailer, camping or recreational vehicle temporarily used as a residence during construction of a permitted use or to temporarily provide watchman security for material that cannot be reasonably stored in an established commercial storage facility.

3. One manufactured home in conjunction with an existing dwelling as a temporary use for the term of a hardship suffered by the existing resident or a relative of the resident. (17)

4. Television, microwave, and radio communication facilities and transmission antenna towers.
5. Utility facilities necessary for public service, (e.g. fire stations, utility substations, parks for public use, etc.) except commercial facilities for the purpose of generating power for public use by sale. (5)

6. Animal hospital or kennel.

7. Church, school, or community building for public or non-profit organizational use. (3,4)

8. The employment of land for the primary purpose of obtaining a profit in money by stabling or training equines.

Section 3.083. Lot Size and Dwelling Density.

The RR zone has minimum lot sizes of 5 and 10 acres which are applied according to policies in the comprehensive plan. Changes in minimum lot size designation from 10 to 5 acres shall only be approved by the Commission when found to be in compliance with the policies related to the urbanization element of the Curry County Comprehensive Plan and upon a determination that all proposed lots are adequate for proper sewage disposal and have a suitable source of water for residential use.

Section 3.084. Set-Backs.

See Article IV.

Section 3.085. Height of Buildings.

See Article IV.

Section 3.086. Off-Street Parking and Loading.
CHAPTER IV - ZONING

ARTICLE 4.1. ZONING-GENERAL

SECTION 4.1.100. Establishment of Zoning Districts.
This Ordinance shall divide the lands within the County into the following zoning districts for the following intended purposes:

A. PRIMARY DISTRICTS

1. Exclusive Agriculture (EFU)

The purpose of the "EFU" district is to preserve the integrity and encourage the conservation of agricultural lands within Coos County and thereby comply with the provisions of ORS 215; to minimize conflicts between agricultural practices and non-farm uses by limiting any development to uses distinguished as dependent upon or accessory to supporting agricultural or forestry production and which qualify such farm lands for special tax relief pursuant to the provisions of Oregon Revised Statutes. This zone is also for the cultivation and marketing of specialty crops, horticultural crops and other intensive farm uses.

2. (RESERVED)

3. Forest (F)

The purpose of the "F" district is to designate forest lands and protect them for forest uses, except where findings establish that certain limited non-forest uses may be allowed. Some of the areas covered by the "F" zone are exclusive forest lands, while other areas include a combination of mixed farm and forest uses.

4. (RESERVED)

5. (RESERVED)

6. Rural Residential (RR-5)

The purpose of the "RR-5" district is to provide for acreage homesites outside of Urban Growth Boundaries (UGB), where a moderate intensity of land development is appropriate, but where urban services and facilities may not be available. The "RR-5" district provides for the orderly development of rural land so as to encourage the continued existence of rural family life and to provide a transition of densities between urban development and exclusive agricultural or forestry uses.
Rural (RR-2)

7. Rural Residential (RR-2)

The purpose of the “RR-2” district is to provide for small acreage homesites outside of Urban Growth Boundaries, where a moderate intensity of land development is appropriate, but where urban services and facilities may not be available or necessary. The “RR-2” district provides for continued existence of rural family life and to provide a transition of densities between urban development and exclusive agricultural and forestry uses.

8. Rural Center (RC)

The purpose of the “RC” district is:

- to provide for the development of rural commercial, tourist commercial, residential and services facilities, necessities, convenience and supplies ancillary to nearby agricultural, forestry, recreational and rural residential uses and activities; and

- to conserve energy by providing for needed commercial outlets in rural areas already “committed” as residential/commercial nodes.

New commercial uses that are consistent with the objectives of the “RC” district are those uses which are needed for the convenient shopping needs of the nearby rural population, and are compatible, or can be made compatible, with surrounding properties.

9. Urban Residential (UR-1)

The purpose of the “UR-1” district is to provide for urban residential areas that are exclusively limited to conventional single family dwellings. Detached conventional single family dwellings clustered in planned unit developments are consistent with the objectives of the “UR-1” district. This district shall only be used within Urban Growth Boundaries and Urban Unincorporated Community boundaries.

10. Urban Residential (UR-2)

The purpose of the “UR-2” district is to provide for urban residential areas that are designed to accommodate single family dwellings, mobile homes and two family dwellings. Clustered planned unit developments, including multi-family dwellings, are consistent with the objectives of the “UR-2” district.
