*American taxpayers are quite interested in knowing how banks have used the money that Treasury has invested under the Capital Purchase Program (CPP). To answer that question, Treasury is seeking responses that describe generally how the CPP investment has affected the operation of your business. We understand that once received, the cash associated with TARP funding is indistinguishable from other cash sources, unless the funds were segregated, and therefore it may not be feasible to identify precisely how the CPP investment was deployed or how many CPP dollars were allocated to each use. Nevertheless, we ask you to provide as much information as you can about how you have used the capital Treasury has provided, and how your uses of that capital have changed over time. Treasury will be pairing this survey with a summary of certain balance sheet and other financial data from your institution's regulatory filings, so to the extent you find it helpful to do so, please feel free to refer to your institution's quarterly call reports to illustrate your answers. This is your opportunity to speak to the taxpayers in your own words, which will be posted on our website.*

What specific ways did your institution utilize CPP capital? Check all that apply and elaborate as appropriate, especially if the uses have shifted over time. Your responses should reflect actions taken over the past year (or for the portion of the year in which CPP funds were outstanding).

What actions were you able to avoid because of the capital infusion of CPP funds?

We were able to avoid becoming under "well" capitalized.

What actions were you able to take that you may not have taken without the capital infusion of CPP funds?

We were able to move \$6.2 million in loans to the Holding Company, enabling us to avoid charge-off at the subsidiary bank level.

Please describe any other actions that you were able to undertake with the capital infusion of CPP funds.

We were able to initiate a program to provide "UP TO" \$12 million in in-house fixed-rate (15-30yr) loans that were not placable on the secondary market for credit worthy borrowers.
