Appendix 2 – Housing Scorecard & Servicer Performance Report

Appendix 3 – Financial Statement

Treasury is pleased to present the Office of Financial Stability's Monthly 105(a) Report for June 2010.

The Troubled Assets Relief Program or TARP was established by Treasury pursuant to the Emergency Economic Stabilization Act of 2008 or EESA. This law was adopted on October 3, 2008 in response to the severe financial crisis facing our country.

To carry out its duties, Treasury has used the TARP authority to make investments that have helped to stabilize the financial system, restore confidence in the strength of our financial institutions, restart markets that are critical to financing American households and businesses, and prevent avoidable foreclosures in the housing market and keep people in their homes. Together with the American Recovery and Reinvestment Act, TARP laid the financial foundation for economic recovery, and TARP succeeded in helping to restore financial stability at a much lower cost than anticipated.

Treasury is now well on its way to winding down the TARP. Specifically:

- The major programs to support banks are closed and Treasury is recovering much of the support provided to financial institutions. As of June, Treasury has recovered more than 75 percent of the funds provided to banks.
- The projected cost of the TARP, as of May 2010, has decreased to \$105.4 billion, a reduction of \$11.4 billion from the estimate in the FY 2011 President's Budget.¹ As recently as the Midsession Review released last August, the Administration estimated the cost of TARP would be \$341 billion.
- The expected fiscal cost of TARP and other forms of government intervention to address the financial crisis has fallen significantly. In early 2009, Treasury estimated that the fiscal cost of TARP and additional financial stabilization efforts could exceed \$500 billion, or 3.5 percent of GDP. It is now expected that the direct costs of all financial interventions will be less than 1 percent of GDP, which is less than the GAO's estimate of the net fiscal cost of 2.4 percent of GDP to clean up the savings and loan crisis. These estimates do not, of course, reflect the full cost of financial crises which must be measured in terms of lost jobs and income and the effects of the economic downturn on American families, communities and businesses.
- The decreases in total costs of TARP are primarily a result of appreciation in the value of the shares of Citigroup common stock held by Treasury. In addition, the estimated value of Treasury's AIFP investments has increased as the outlook for the domestic automobile industry has improved. Lastly, the estimated cost related to AIG has decreased by \$2.9 billion as prospects for the company have improved. Remaining TARP costs are derived from homeowner relief programs as well as the assistance provided to the automotive industry and AIG. Programs that were designed to assist banking institutions will result in a net gain to the taxpayer.

Authority to make commitments through TARP will expire in October 2010. See "Where is TARP Money Going – Proposal to End TARP Authority" below for an update on a potential reduction in TARP spending authority. Treasury will continue to manage remaining investments in a way that protects taxpayers and supports our financial and economic recovery.

¹ Project costs represent deficit impact.

Key Developments

The following key developments took place during June 2010 under existing TARP programs:

- **Total TARP repayments** reached more than \$198 billion. More funds have now been recovered than remain outstanding (as of June 30, 2010).
- **Cumulative income** from TARP investments is more than \$24 billion.
- Under the **Capital Purchase Program (CPP)**:
 - Treasury has now sold a total of 2.6 billion shares of common stock in Citigroup, Inc. (Citigroup), for proceeds of approximately \$10.5 billion at an average price per share of \$4.03. Treasury currently owns approximately 5.1 billion shares of Citigroup common stock and expects to continue selling its shares in the market in an orderly fashion.
 - Repayments of CPP investments in June included \$950 million by Lincoln National Corporation.
 - Treasury conducted public auctions for the warrants issued by First Financial Bancorp and Sterling Bancshares, Inc., each with gross proceeds of approximately \$3 million.
- Under the **Automotive Industry Financing Program (AIFP)**, Treasury provided guidance on its role in the exploration of a possible initial public offering of the common stock of General Motors Company (GM). See “Program Updates” below.
- On June 21, the U.S. Department of Housing and Urban Development (HUD) and the Treasury introduced a **Monthly Housing Scorecard** on the nation’s housing market. Each month, the scorecard will incorporate key housing market indicators and highlight the impact of housing recovery efforts, including assistance to homeowners through the Federal Housing Administration and the TARP **Home Affordable Modification Program (HAMP)**. Among the housing recovery efforts, HAMP offers a standardized, streamlined mortgage modification process and financial incentives to encourage servicers and investors to undertake sustainable mortgage modifications.
 - The scorecard contains key data on the health of the housing market, incorporates the Monthly Servicer Report and details new reporting data on the Disposition Path of Canceled Trials and on Compliance Activities. See “Program Updates” below. *The complete **Housing Scorecard and Servicer Performance Report** is attached as Appendix 2.*
- On June 23, Treasury approved state plans for use of the \$1.5 billion in the first **Hardest Hit Fund (HHF)** foreclosure-prevention programs in Arizona, California, Florida, Michigan, and Nevada.
 - These programs are designed to provide relief to struggling homeowners. The specific implementation and timing will depend on the types of programs offered, specific state-level procurement procedures, compliance readiness and other factors.
 - The approved proposals include programs to assist struggling homeowners with negative equity through principal reduction; assist

the unemployed or under-employed make their mortgage payments; assist in the payment of arrearages; facilitate the settlement of second liens; and facilitate short sales and/or deeds-in-lieu of foreclosure. Below is a chart that highlights which types of programs each state plans to implement:

	1 st Lien Principal Reduction	Unemployment Assistance	Arrearage Extinguishment	2 nd Lien Principal Reduction	Short Sale Facilitation
Arizona	✓	✓		✓	
California	✓	✓	✓		✓
Florida	✓	✓		✓	
Michigan	✓	✓	✓		
Nevada	✓			✓	✓

State-by-state summaries of the HHF proposals are available at http://www.MakingHomeAffordable.gov/pr_06232010.html, and copies of the complete proposals are available at <http://www.FinancialStability.gov/roadtostability/hardesthitfund.html>.

Where is TARP Money Going?

Treasury has used the TARP authority to make investments that have helped to stabilize the financial system, restore confidence in the strength of our financial institutions, restart markets that are critical to financing American households and businesses, and prevent avoidable foreclosures in the housing market and keep people in their homes.

A large part of the total investments occurred in 2008 under the Capital Purchase Program. The commitments made in 2009 and 2010 include amounts extended under the Obama Administration's Financial Stability Plan. These include funds committed under the Home Affordable Modification Program, the Legacy Securities Public-Private Investment Program, the Automotive Industry Financing Program and the other programs described in this report (and Appendix 1).²

Existing TARP Budget, Investments and Disbursements

As of June 30, 2010, approximately \$537 billion had been planned for TARP programs and of that amount:³

- \$491 billion has been committed to specific institutions under signed contracts.
- \$385 billion has been paid out by Treasury under those contracts.

The charts on the following pages show, as of June 30, 2010, (i) a summary of the planned TARP investment amounts together with the total funds disbursed and investments that have been repaid by program, (ii) the overall planned TARP investments by program; and (iii) the amount of TARP investments by both the amount obligated – or committed for investment – and the amount disbursed or actually paid out, over each month since inception.

Proposal to End TARP Authority

During the deliberations in Congress of the proposed Wall Street Reform and Consumer Protection Act, a provision was included that would amend EESA and have three principal effects on the TARP authority:

- Total disbursements under TARP would be capped, potentially at \$475 billion;
- The amount of TARP investments that were repaid could not be used to increase spending; and
- Obligations could not be incurred for programs or initiatives that were not initiated as of June 25, 2010.

Treasury will reduce the TARP budget to conform to these limitations, assuming they become law.

² Taxpayers can track progress on all of the financial stability programs on Treasury's website www.FinancialStability.gov. Specifically, taxpayers can look at investments and repayments within two business days of closing in the TARP transaction reports at www.FinancialStability.gov/latest/reportsanddocs.html.

³ See footnotes ** and *** to Figure 1.

Figure 1: TARP Summary through June 2010 (\$ billions)

	Planned Investments	Commitments	Total Disbursed	Repayments
Capital Purchase Program	\$ 204.89	\$ 204.89	\$ 204.89	\$ 138.40
<i>Citigroup repayment*</i>				\$ 8.48
Targeted Investment Program	\$ 40.00	\$ 40.00	\$ 40.00	\$ 40.00
Asset Guarantee Program	\$ 5.00	\$ 0.00	\$ 0.00	\$ 0.00
Consumer and Business Lending Initiative**	\$ 52.00	\$ 20.18	\$ 0.19	\$ 0.00
Legacy Securities Public-Private Investment Program	\$ 30.00	\$ 30.36	\$ 12.41	\$ 0.37
AIG	\$ 69.84	\$ 69.84	\$ 47.54	\$ 0.00
Auto Industry Financing Program	\$ 84.84	\$ 84.84	\$ 79.69	\$ 11.20
Home Affordable Modification Program***	\$ 50.00	\$ 41.32 ***	\$ 0.25 ***	\$ 0.00
Totals	\$536.58 **	\$491.43	\$384.98	\$198.44

* Of the \$10.51 billion in proceeds from Citigroup common stock sales, \$8.48 billion is reflected as repayment, and \$2.03 billion is reflected as income (see Figures 5). Together with the CPP repayments stated in the line above, the total amount of CPP repayments is \$146.88 billion.

** \$52 billion has been reserved for the Consumer and Business Lending Initiative, of which \$20 billion has been allocated to the Term Asset-Backed Securities Lending Facility. While \$30 billion has been reserved for a small business lending program, the Treasury has proposed creating a \$30 billion Small Business Lending Fund separate from TARP through legislation. Not more than \$1 billion is planned for the Small Business and Lending Initiative - SBA 7a Securities Purchase Program and not more than \$1 billion is planned for the Community Development Capital Initiative.

*** TARP funds obligated include the total amount of funds that may be provided to servicers under existing agreements for the Home Affordable Modification Program (HAMP). In light of recent changes to HAMP as well as recent experience, Treasury expects to reestimate and revise these amounts in the next few months which will change this total. Treasury expects that the process will also result in there being sufficient funds to finance two recently announced TARP housing initiatives, consisting of \$2.1 billion for the HFA Hardest Hit Fund and \$14 billion for the FHA Refinance Program. TARP funds for HAMP do not include \$1.26 billion to offset costs of program changes for the "Helping Families Save Their Homes Act of 2009" (\$1.244 billion) or administrative expenditures relating to the Special Inspector General for the TARP (\$15 million). Including the foregoing, as of June 30, 2010, total TARP commitments and amounts paid out as adjusted were \$42.58 billion and \$1.51 billion, respectively.

Figure 2: Planned TARP Investments (\$ billions) through June 2010

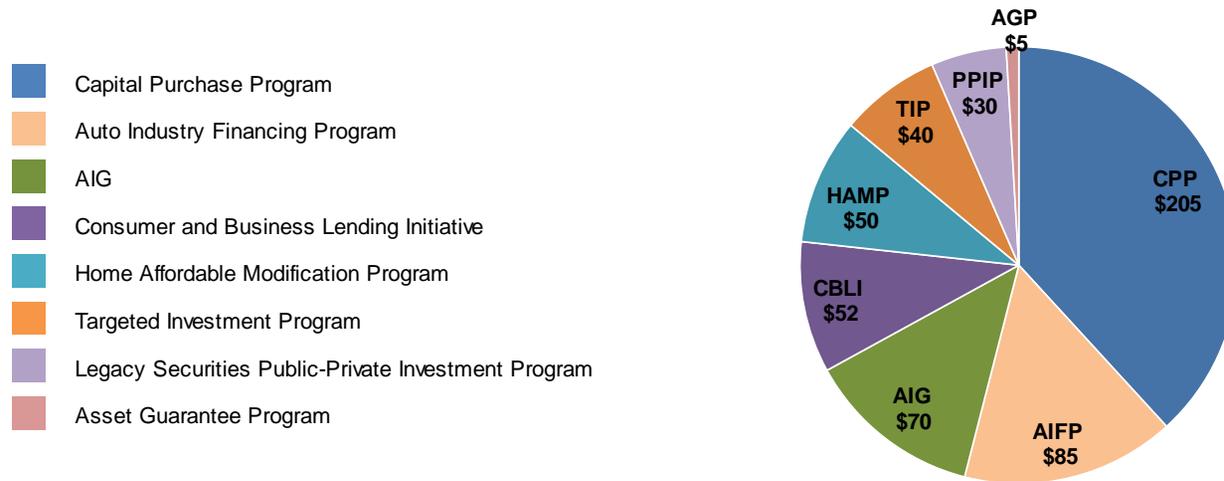

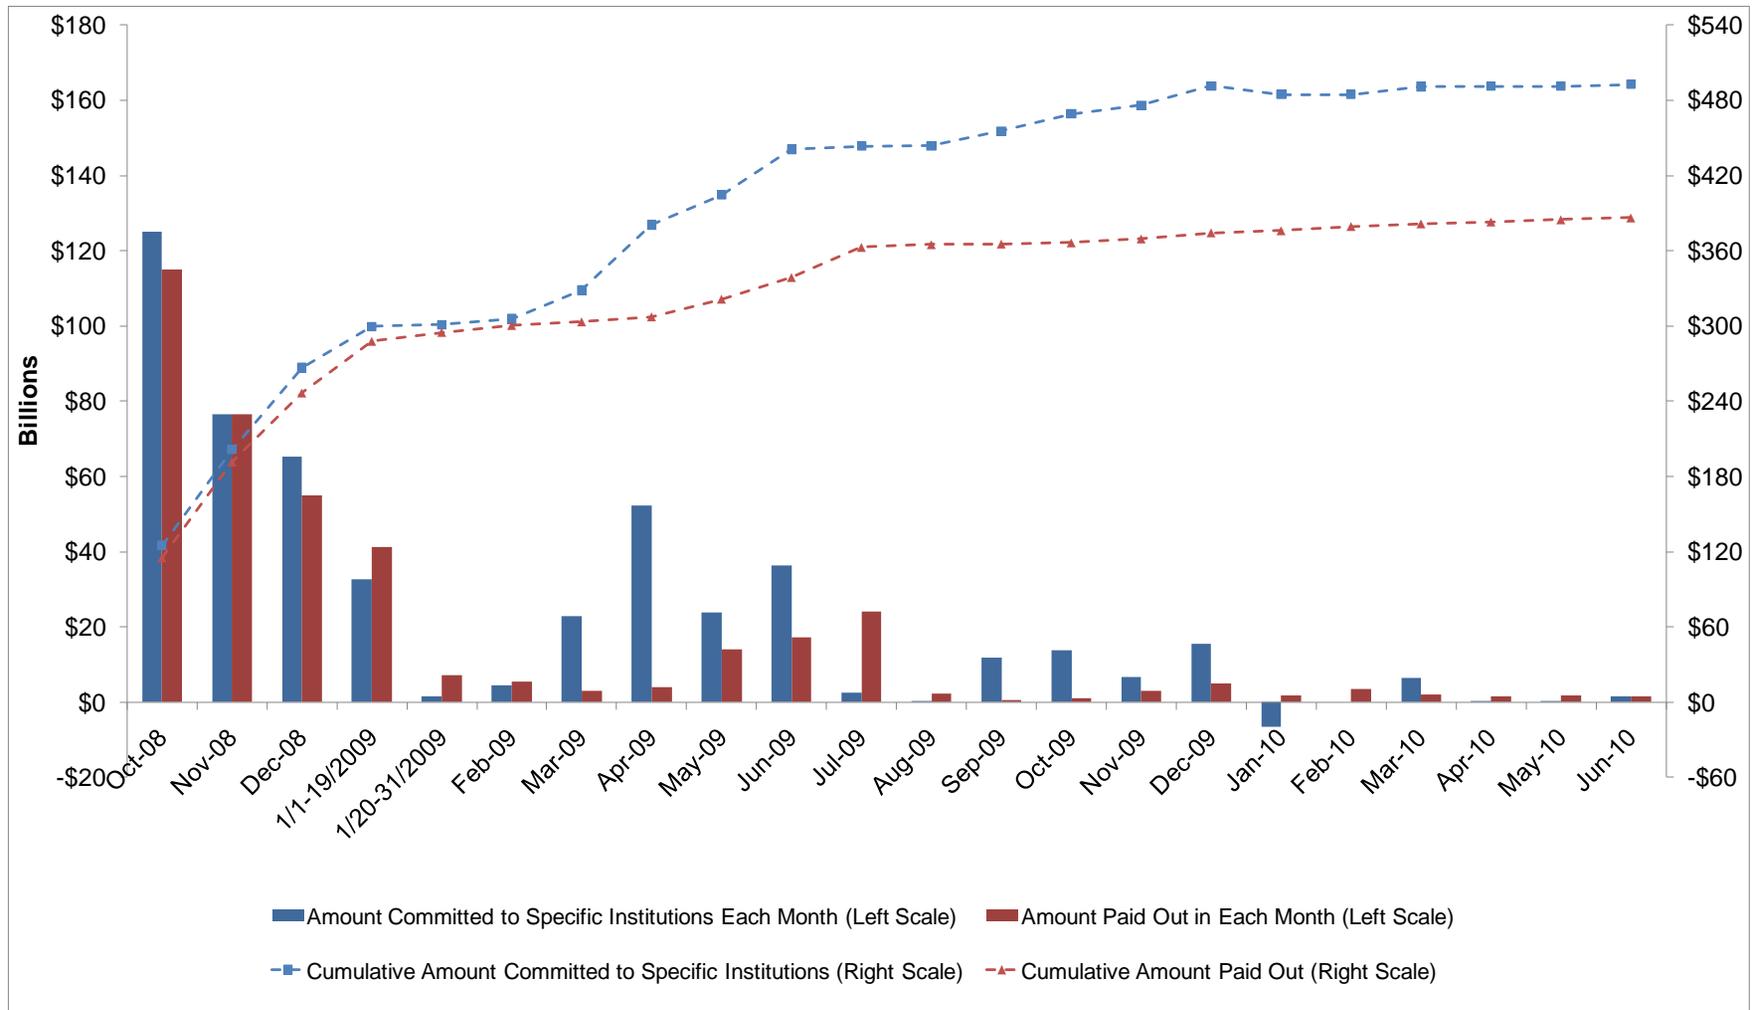

Figure 3: Funds committed and paid out under TARP from October 2008 through June 2010

Program Updates

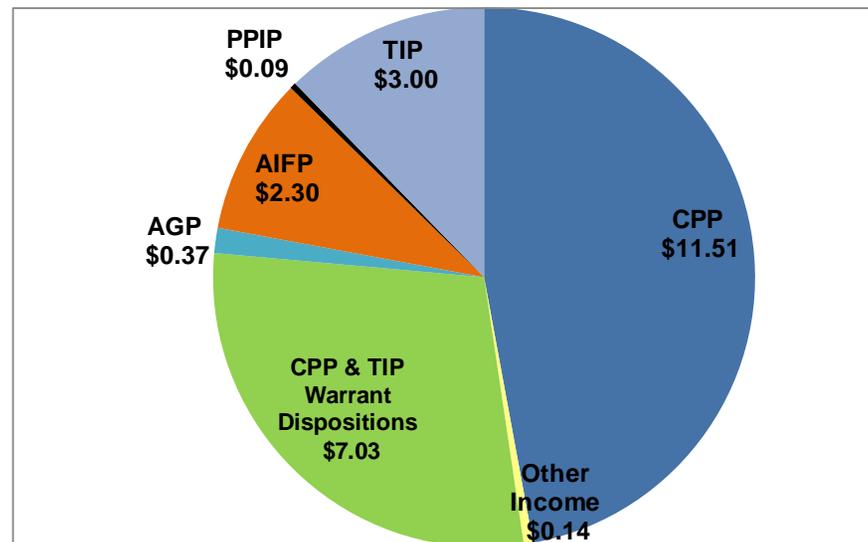

Dividends, Interest and Other Income Received

Most of the TARP money has been used to make investments in preferred stock or loans of financial institutions.⁴

- In June, Treasury received approximately \$310 million in dividends, interest and distributions from TARP investments, \$14 million in gross proceeds from CPP warrant dispositions (auctions and repurchases), and approximately \$719 million in income from the Citigroup common stock disposition.⁵
- Cumulative proceeds from TARP investments has reached approximately \$24.44 billion, consisting of \$17.41 billion of dividends, interest, distributions and other income, and \$7.03 billion of warrant sales from CPP and the Targeted Investment Program (TIP) investments.

Figure 4 shows total income from dividends, interest and distributions, other income and warrant sales in all TARP programs.

Figure 4: Total dividends, warrant proceeds and other income from TARP investments through June 2010 (\$ billions)

⁴ Numbers in text and tables may not add up because of rounding.

⁵ Of the \$4.3 billion in proceeds received in June from the Citigroup common stock disposition, \$3.6 billion was repayment and \$0.7 billion was income.

Capital Purchase Program

Treasury created the Capital Purchase Program in October 2008 to stabilize the financial system by providing capital to viable banks of all sizes throughout the nation. This program is now closed; Treasury estimates the program will result in a positive return for taxpayers. Of the \$205 billion invested, more than \$146 billion has already been repaid.⁶

Figure 5 shows the cumulative CPP activity since program inception. Proceeds from the repurchases of securities acquired from an exercised warrant are included as cash received from sales of warrants.

Figure 5: CPP Snapshot since inception

CPP Cumulative Investments		CPP Income to Treasury	
Number of Institutions:	707*	Total Dividends and Interest:	\$9.48. billion
Amount Invested:	\$205 billion	<i>June Dividends and Interest:</i>	\$110.54 million
Largest Investment:	\$25 billion	Total Fee Income:	\$13 million
Smallest Investment:	\$301,000		
* Banks in 48 states, D.C. and Puerto Rico		Total Warrant Income:***	\$7.03 billion**
CPP Repayments		Number of Institutions:	61
Total Amount of Repayments:	\$138.40 billion	<i>CPP Repurchase Amount:</i>	\$2.95 billion
<i>Citigroup Repayments:**</i>	\$8.48 billion	<i>CPP & TIP Auction Amount:</i>	\$4.08 billion
Number of Institutions Fully Repaid:	76	<i>Citigroup Income:**</i>	\$2.03 billion
Number of Institutions Partially Repaid:	7		
**Represents repayment and income, respectively, from \$10.51 billion of proceeds		CPP Total Income:	\$18.54 billion
		*** Includes TIP warrants and proceeds from exercised warrants	

Repayments

Seventy-six (76) of the banks that received investments under CPP have repaid Treasury in full. Treasury continues to work with federal banking regulators who must evaluate requests from CPP participants interested in repaying Treasury’s investment.

⁶ Further information on the Capital Purchase Program is available in Appendix 1 and at <http://www.FinancialStability.gov/roadtostability/capitalpurchaseprogram.html>. Repayments include amounts from the sales of Citigroup common stock.

CPP Dividends and Interest

Cumulative dividends and interest received from CPP investments through month-end together was approximately \$9.48 billion, and the amount of dividends and interest received in June was \$110.54 million.⁷

Dispositions

The overriding objective of EESA was to “restore liquidity and stability to the financial system of the United States” in a manner which “maximizes overall returns to the taxpayers.” Consistent with the statutory requirement, Treasury’s four portfolio management guiding principles for the TARP are: (i) protect taxpayer investments and maximize overall investment returns within competing constraints; (ii) promote stability for and prevent disruption of financial markets and the economy; (iii) bolster market confidence to increase private capital investment; and (iv) dispose of investments as soon as practicable, in a timely and orderly manner that minimizes financial market and economic impact.

- **Warrant Auctions**

In June, Treasury conducted the previously announced public auctions for the warrants issued by First Financial Bancorp and Sterling Bancshares, Inc., each with gross proceeds of approximately \$3 million.

- **Citigroup Common Stock Disposition**

Pursuant to the June 2009 Exchange Agreement between Treasury and Citigroup, which was part of a series of exchange offers conducted by Citigroup to strengthen its capital base, Treasury exchanged the \$25 billion in preferred stock it received in connection with Citigroup’s participation in the Capital Purchase Program for common stock at a price of \$3.25 per common share for approximately 7.7 billion shares.

As of June 30, Treasury has sold a total of approximately 2.6 billion shares of Citigroup common stock at an average price per share of \$4.03, and has received total gross proceeds of approximately \$10.5 billion from the sales.

- In April, Treasury entered into a pre-arranged written trading plan with Morgan Stanley & Co. Incorporated (Morgan Stanley) as its sales agent and gave discretionary authority to sell up to 1.5 billion shares of common stock under certain parameters during the period ending on June 30, 2010. Completion of the sale under this authority occurred on May 26, 2010.
- Treasury then entered into a second pre-arranged written trading plan with its sales agent that provided discretionary authority for the sale up to 1.5 billion additional shares under certain parameters. Because Treasury will not sell shares during the blackout period set by Citigroup in advance of its second quarter earnings release, which period began on July 1, the plan terminated on June 30. Treasury completed the sale of approximately 1.1 billion shares under this plan.

⁷ Treasury’s Dividends and Interest Reports for TARP programs are available at <http://www.FinancialStability.gov/latest/reportsanddocs.html>.

- To enable these sales, Citigroup filed a prospectus supplement with the Securities and Exchange Commission covering Treasury's common stock. These sales of common stock do not include Treasury's holdings of Citigroup trust preferred securities or warrants for common stock.

Also in June, Treasury announced that 12 small broker-dealers will work with Morgan Stanley in connection with the sale of the Citigroup common stock.

- ***Exchange for Other Securities***

In limited cases, in order to protect the taxpayers' interest in the value of the CPP investment and promote financial stability, Treasury may participate in exchanges of CPP preferred stock for other securities or may participate in a direct disposition of the CPP investment to new investors who are able to provide fresh equity investment, conduct a capital restructuring or otherwise strengthen the capital position of the bank.

- In June 2010, Treasury exchanged \$46.4 million of its \$116 million preferred stock in First Merchants Corporation for a like amount of non tax-deductible trust preferred securities (TruPS) issued by First Merchants Capital Trust III. Prior to the exchange, First Merchants had raised \$24.1 million of common equity in a private placement of shares. As a result of the equity raise and exchange transaction, First Merchants' Tier 1 common ratio increased from 5.69% to 6.63%.

Automotive Industry Financing Program

General Motors Initial Public Offering (IPO) and Treasury Disposition

As a significant step in carrying out Treasury's intention to dispose of TARP investments as soon as practicable, in June, Treasury provided guidance on its role in the exploration of a possible initial public offering by General Motors Company (GM). The full statement is available at http://www.FinancialStability.gov/latest/pr_06102010b.html. The following are excerpts from the statement:

- The exact timing of GM's initial public offering will be determined by GM in light of market conditions and other factors, but will not occur before the fourth quarter of this year at the earliest. Treasury will retain the right, at all times, to decide whether and at what level to participate in the offering, should it occur.
- The initial public offering is expected to include the sale of shares by Treasury, other shareholders who wish to participate, and GM. The overall size of the offering and relative amounts of primary and secondary shares will be determined at a later date.
- The selection of the lead underwriters will be made by GM, subject to Treasury's agreement that the selection is reasonable. However, Treasury will determine the fees to be paid to the underwriters.

- The process of an IPO is substantially different from the sale of securities that Treasury has made to date, which have involved companies that are already publicly traded. An IPO requires more extensive preparations by the company and will involve a number of decisions that have important consequences for years after the sale. GM must prepare the registration statement, prospectus and other legal documentation, work with the staff of the Securities and Exchange Commission (SEC) and meet with potential investors and other interested parties. GM must determine that it is, in all relevant respects, ready to become a public company. For those reasons, it is critical that the process of preparing for a potential IPO be managed by GM. Therefore, Treasury will participate in the preparations for the offering consistent with its obligations under EESA, its rights under the contracts entered into at the time of the restructuring of GM and its previously articulated principles for how Treasury acts as a shareholder.
- Federal securities laws preclude Treasury from discussing certain other matters including any discussion of the identity of potential underwriters, prior to the filing of a registration statement with the SEC.
- Treasury's current investment in GM includes 60.8% of the common stock of GM and \$2.1 billion in preferred stock. Treasury acquired the common and preferred stock in GM's restructuring as part of the Automotive Industry Financing Program under the Troubled Asset Relief Program.⁸

⁸ Further information on Treasury's Automotive Industry Financing Program is available at <http://www.FinancialStability.gov/roadtostability/autoprogram.html> and in Appendix 1. The current shareholders of GM are: Treasury (60.8%), GM Voluntary Employee Benefit Association (VEBA) (17.5%), the Canadian Government (11.7%), and unsecured bondholders of Motors Liquidation Company (Old GM) (10%). As part of the restructuring, GM issued warrants to acquire shares of common stock to Old GM (for eventual distribution to its creditors following liquidation) and to VEBA.

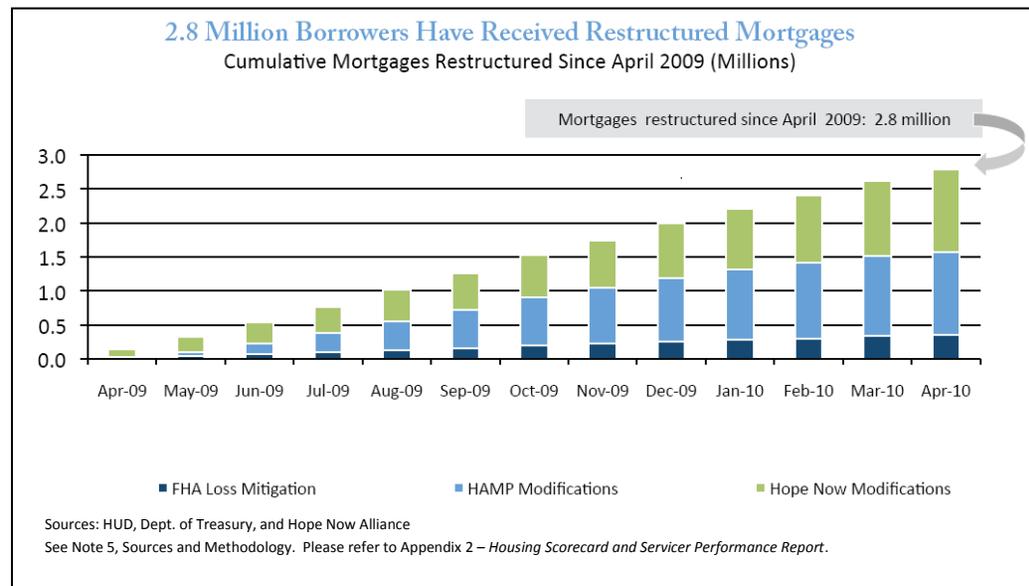

Home Affordable Modification Program

Housing Scorecard

On June 21st, HUD and Treasury introduced the **Housing Scorecard** on the nation’s housing market, which will now incorporate the Servicer Performance Report. Each month, the scorecard will present key housing market indicators and highlight the impact of the Administration’s housing recovery efforts, including assistance to homeowners through the Federal Housing Administration (FHA) and the Home Affordable Modification Program. The Housing Scorecard is available at www.hud.gov/scorecard, and attached as Appendix 2.

Key data presented on the health of the housing market shows among others that:

- After 30 straight months of decline and an expectation of continued significant deterioration, home prices have leveled off in the past year and expectations have adjusted upward.
- The number of homeowners receiving restructured mortgages since April 2009 has increased to 2.8 million (see chart below).
 - This includes more than 1.2 million homeowners who have started HAMP trial modifications and nearly 400,000 who have benefited from FHA loss mitigation activities.
 - In the HAMP program, nearly 347,000 homeowners have entered a permanent modification with a median saving of more than \$500 per month.

The Administrations' housing initiatives were intended to help prevent avoidable foreclosures and stabilize the housing market. However, the foreclosure prevention initiatives were not designed to help every borrower and the housing market will continue to adjust for some time.

Servicer Performance Report Through 2010

The Housing Scorecard now incorporates the monthly Servicer Performance Report. The HAMP modification data in the Servicer Performances Report Through May 2010 (included in Appendix 2) shows:

- A month-over-month increase in permanent modifications, with average growth of roughly 50,000 permanent modifications per month over the last four months.
 - Permanent modifications have been made to almost 347,000 homeowners, and over 47,000 trial modifications converted to permanent modifications in May, an increase of almost 15.6 percent from April.
- Borrowers in permanent modifications are experiencing a median payment reduction of 36 percent, more than \$500 per month.

As part of the continued development of the data collected and monitored from servicers, this month's scorecard and performance report includes servicer data on the Disposition Path of Canceled Trials and on Compliance Activities.

- Servicer data indicates nearly half of the homeowners unable to enter a HAMP permanent modification enter an alternative modification with their servicer.
 - Fewer than 10 percent of canceled trials move into the foreclosure process.
- The Housing Scorecard also detailed new reporting under HAMP on both the scope of compliance activities and the areas of focus for compliance reviews.

Consumer and Business Lending Initiatives

Community Development Capital Initiative

In June, Treasury released the final forms of agreements⁹ for the Community Development Capital Initiative (CDCI), a program in which Treasury will invest lower-cost capital in Community Development Financial Institutions (CDFIs) that operate in markets underserved by traditional financial institutions. CDFIs are banks, thrifts, bank holding companies, savings and loan holding companies, and credit unions that target more than 60 percent of their small business lending and other economic development activities to low- and moderate-income communities. Treasury is working in consultation with the federal banking and credit union agencies to process and make a determination on all applications submitted to the CDCI.

⁹ More information is available at <http://www.FinancialStability.gov/roadtostability/comdev.html>

Small Business and Community Lending Initiatives - SBA 7a Securities Purchase Program

In March 2009, Treasury and the Small Business Administration announced several initiatives directed at enhancing credit for small businesses, including a Treasury program to purchase SBA-guaranteed securities (“pooled certificates”). Treasury subsequently developed a pilot program to purchase SBA-guaranteed securities from one pool assembler, and as of June 30, 2010, has agreed to purchase or have already purchased securities in an aggregate purchase face amount of approximately \$163 million.

Term Asset-Backed Securities Loan Facility (TALF)

A joint Treasury-Federal Reserve program, the Term Asset-Backed Securities Loan Facility supported by TARP begun in March 2009 played a key role in enabling the securitization markets important for consumer and small business loans to improve. The TALF operated as a lending facility of the Federal Reserve Bank of New York (FBRNY) to provide non-recourse term loans collateralized by AAA-rated asset-backed securities (ABS), and by commercial mortgage-backed securities (CMBS). Treasury provided credit support for TALF. In June 2010, the TALF ceased making loans. Since the program launch, a total \$70 billion of TALF loans backing eligible ABS and CMBS has been extended, of which \$43 billion is currently outstanding.

Data from the Federal Reserve has indicated that for most ABS asset classes, interest rate spreads have tightened to levels below the TALF loan rate, thereby reducing the need for support to the ABS through the facility. This is one measure of the improving health of these asset classes. The expiration of TALF is expected to have limited impact on spreads for those asset types that were considered TALF-eligible, as there has been an increasing level of demand by cash-only investors, minimizing the use of the TALF loans.

Bank Surveys***Monthly Surveys***

Each month, Treasury has asked banks participating in the CPP to provide information about their lending and intermediation activities and publishes the results in reports available at <http://www.FinancialStability.gov/impact/surveys.htm>. The reports are intended to help the public easily assess the lending activities of CPP banks.

- The *Monthly Lending and Intermediation Snapshot*, for the 22 largest recipients of CPP investments and which was first published in January 2009 with data from inception of the CPP, provides quantitative information on three major categories of lending – consumer, commercial, and other activities – based on banks’ internal reporting, and commentary to explain changes in lending levels for each category. Beginning with the December 2009 Snapshot (released in February 2010), banks that had repaid CPP funds in June 2009 no longer submitted data to Treasury. As the reporting group contracted with additional CPP repayments, Treasury has ceased to publish a summary analysis because the aggregate month to month changes are no longer meaningful. Treasury continues to publish the reports and underlying data from the banks that continue to submit Snapshot data.
- The *CPP Monthly Lending Report* includes all participants in the CPP and is published in addition to the Monthly Lending and Intermediation Snapshot. The Lending Report makes available three data points on a monthly basis: average outstanding balances

of consumer loans, commercial loans, and total loans from all CPP participants

CPP Quarterly Report

An interagency group consisting of representatives from Treasury, the Federal Reserve Board, and other Federal banking agency functions conducts periodic analysis of the effect of TARP programs on banking organizations and their activities, and publishes the results in reports available at <http://www.FinancialStability.gov/impact/CPPreport.html>. This *Quarterly CPP Report* analyzes the financial data submitted by depository institutions to their primary federal regulator in Call Reports and Thrift Financial Reports, as well as the Y-9C Reports submitted by large bank holding companies each quarter to the Federal Reserve.

Annual Use of Capital Survey

Treasury has also initiated an annual *Use of Capital Survey* to obtain insight into the lending, financial intermediation, and capital building activities of all recipients of government investment through CPP funds. Collection of the Use of Capital survey data began during March, with responses due in the second calendar quarter of 2010. Data and survey results will be available at <http://www.FinancialStability.gov/useofcapital>. The Use of Capital Survey is designed to capture representative information of CPP fund usage without imposing excessive burdens on institutions, and will cover how each financial institution has employed the capital infusion of CPP funds from the date it initially received the funds until the end of 2009. Treasury will also publish summary balance sheet and income statement information from each institution's regulatory filings.

Congressional Hearings

During June, Treasury officials appeared at the following Congressional hearings:

Congressional Oversight Panel

"Oversight of TARP"

Secretary of the Treasury, Timothy F. Geithner

http://www.FinancialStability.gov/latest/tg_06222010.html

Certification

As Assistant Secretary for Financial Stability at the United States Department of the Treasury, I am the official with delegated authority to approve purchases of troubled assets under the Troubled Assets Relief Program. I certify to the Congress that each decision by my office to approve purchases of troubled assets during this reporting period was based on the office's evaluation of the facts and circumstances of each proposed investment, including recommendations from regulators, in order to promote financial stability and the other purposes of the Emergency Economic Stabilization Act of 2008.

Herbert M. Allison, Jr.

What is the Capital Purchase Program (CPP)?

- Treasury created the Capital Purchase Program in October 2008 to stabilize the financial system by providing capital to viable banks of all sizes throughout the nation. Under this program, Treasury invested in banks and other financial institutions to increase their capital. With a strengthened capital base, banks have an increased capacity to invest in assets, lend to businesses and consumers and to support the U.S. economy. The CPP investment amount was determined by the size of the bank: no less than one percent and no greater than three percent (five percent for small banks) of the recipient’s risk-weighted assets.
- Although many banks were fundamentally sound, because of the capital restraints caused by the troubled market conditions, they were hesitant to lend. The level of confidence between banks and other financial institutions was also low, so they were unwilling to lend to each other. Restoring capital and confidence is essential to allowing the financial system to work effectively and efficiently.
- The CPP remained open through 2009 for investments in small banks, with terms aimed at encouraging participation by small community banks that are qualified financial institutions (QFIs) under CPP terms. The last application deadline was in November 2009 and final investments occurred in December 2009.
- This program is now closed. Treasury expects the CPP will result in a positive return for taxpayers.

How does the CPP work?

- Treasury purchased senior preferred shares and other interests from qualifying U.S.-controlled banks, savings associations, and other financial institutions. Treasury also receives warrants to purchase common shares or other securities from the banks.
- The charts below show the number of banks by investment amount (left) and total CPP funds disbursed by investment amount (right).

- Banks participating in the CPP pay Treasury dividends on the preferred shares at a rate of five percent per year for the first five years following Treasury's investment and at a rate of nine percent per year thereafter. S-corporation banks pay an interest rate of 7.7 percent per year for the first five years and 13.8 percent thereafter. Preferred shares (or stock) are a form of ownership in a company.
- Banks may repay Treasury under the conditions established in the purchase agreements as amended by the American Recovery and Reinvestment Act. Treasury also has the right to sell the securities. The repayment price is equal to what Treasury paid for the shares, plus any unpaid dividends or interest.
- When a publicly-traded bank repays Treasury for the preferred stock investment, the bank has the right to repurchase its warrants. The warrants do not trade on any market and do not have observable market prices. If the bank wishes to repurchase warrants, an independent valuation process is used to establish fair market value. If an institution chooses not to repurchase the warrants, Treasury is entitled to sell the warrants. In November and December 2009, Treasury began public offerings registered with the Securities and Exchange Commission for the sale of warrants using a modified Dutch auction methodology. More information is available in the Warrant Disposition Report available at <http://www.financialstability.gov/docs/TARP%20Warrant%20Disposition%20Report%20v4.pdf>

What was the Supervisory Capital Assessment Program (SCAP) and Capital Assistance Program (CAP)?

- The Supervisory Capital Assessment Program and Capital Assistance Program were important components of the Financial Stability Plan to help ensure that banks have a sufficient capital cushion in a more adverse economic scenario. SCAP was a comprehensive capital assessment exercise, or "stress test", for the largest 19 U.S. bank holding companies and a complement to the CAP.
- In November 2009, Treasury announced the closure of the Capital Assistance Program. Of the 19 banks that participated in the SCAP, 18 demonstrated no need for additional capital or fulfilled their need in the private market.
- GMAC was the only financial institution not able to raise sufficient capital in the private market, and in December 2009, GMAC and Treasury completed the investment contemplated in May, an additional \$3.8 billion, which was funded under the Automotive Industry Financing Program.
- Following announcement of the stress test results, the largest banking institutions raised over \$140 billion in high-quality capital and over \$60 billion in non-guaranteed unsecured debt in the private markets. Banks used private capital to repay TARP investments, allowing TARP to fulfill its function as a bridge to private capital.

How did the SCAP and the CAP work?

- Federal banking supervisors conducted forward-looking assessments to estimate the amount of capital banks would need to absorb losses in a more adverse economic scenario and to provide the transparency necessary for individuals and markets to judge the strength of the banking system. Results of the stress tests were released on May 7, 2009.

- Some banks were required to take steps to improve the quality and/or the quantity of their capital to give them a larger cushion to support future lending even if the economy performs worse than expected. Banks had a range of options to raise capital in the private markets, including common equity offerings, asset sales and the conversion of other forms of capital into common equity. Banks that did not satisfy their requirement by using these options could request additional capital from the government through the CAP. Financial institutions had to submit a detailed capital plan to supervisors, who consulted with Treasury on the development and evaluation of the plan. Any bank needing to augment its capital buffer at the conclusion of the SCAP was required to develop a detailed capital plan in June 2009, and had until November 2009 to implement that capital plan.
- In cases in which the SCAP indicated that an additional capital buffer was warranted, institutions had an opportunity to turn first to private sources of capital, but were also eligible to receive government capital via investment available immediately through the CAP. Eligible U.S. banks that did not participate in the SCAP could have applied to their primary federal regulator to receive capital under the CAP.

What was the Asset Guarantee Program (AGP)?

- Under the AGP, Treasury acted to support the value of certain assets held by qualifying financial institutions, by agreeing to absorb unexpectedly large losses on certain assets. The program was designed for financial institutions whose failure could harm the financial system and was used in conjunction with other forms of exceptional assistance.
- The program is closed, and resulted in a positive return to the taxpayers.

Who received assistance under the AGP?**Citigroup**

- TARP funds were committed as a reserve to cover up to \$5 billion of possible losses on a \$301 billion pool of Citigroup's covered assets. As a premium for the guarantee, Treasury received \$4.034 billion of preferred stock, subsequently exchanged for trust preferred securities, with identical terms as the securities received under the TIP, and Treasury also received warrants to purchase approximately 66 million shares of common stock at a strike price of \$10.61 per share. For the period that the Citigroup asset guarantee was outstanding, Citigroup made no claims for loss payments to any federal party and consequently Treasury made no guarantee payments of TARP funds to Citigroup.

Bank of America

- In January 2009, Treasury, the Federal Reserve and the FDIC agreed to share potential losses on a \$118 billion pool of financial instruments owned by Bank of America, consisting of securities backed by residential and commercial real estate loans and corporate debt and derivative transactions that reference such securities, loans and associated hedges.

- In December 2009, Treasury, the Federal Deposit Insurance Corporation (FDIC), the Federal Reserve Bank of New York (FRBNY) and Citigroup, agreed to terminate Citigroup's AGP agreement, pursuant to which: (1) Treasury's guarantee commitment was terminated, (2) Treasury agreed to cancel \$1.8 billion of the trust preferred securities issued by Citigroup from \$4.034 billion to \$2.234 billion for early termination of the guarantee, (3) the FDIC and Treasury agreed that, subject to certain conditions, the FDIC would transfer up to \$800 million of trust preferred securities to Treasury at the close of Citigroup's participation in the FDIC's Temporary Liquidity Guarantee Program, and (4) Citigroup agreed to comply with the determinations of the Special Master for TARP Executive Compensation as if its obligations related to exceptional financial assistance had remained outstanding through December 31, 2009 and (in addition to compliance with the executive compensation provisions of EESA's Section 111, as amended) to permit, for 2010, the Federal Reserve Board of Governors, in consultation with the Office of the Comptroller of the Currency and the FDIC, to review the actual incentive compensation arrangements for Citigroup's top 30 earners to be sure they comport with the Board of Governors' incentive compensation principles as set forth in the Board of Governors' guidance.
- In September 2009, Treasury, the Federal Reserve and Bank of America agreed to terminate the asset guarantee arrangement announced in January 2009. In connection with that termination and in recognition of the benefits provided by entering into the term sheet for such arrangement, Bank of America paid the U.S. government \$425 million, including \$276 million to Treasury.

What are the Targeted Investment Program (TIP) and the AIG Investment?

- Pursuant to EESA, Treasury has provided exceptional assistance on a case-by-case basis in order to stabilize institutions that were considered systemically significant to prevent broader disruption of financial markets.
- Treasury provided this assistance by purchasing preferred stock, and also received warrants to purchase common stock, in the institutions.

How did the TIP work?

- Under the TIP, Treasury purchased \$20 billion in preferred stock from Citigroup Inc. and \$20 billion in preferred stock from Bank of America Corporation. Both preferred stock investments paid a dividend of eight percent per annum. The TIP investments were in addition to CPP investments in these banks.
- As part of an exchange offer designed to strengthen Citigroup's capital, Treasury exchanged all of its CPP preferred stock in Citigroup for a combination of common stock and trust preferred securities, and the TIP preferred shares were exchanged for trust preferred securities.
- In December 2009, Bank of America and Citigroup repaid their TIP investments in full. Treasury continues to hold warrants acquired from Citigroup under the TIP. The Bank of America TIP warrants were sold in a public auction.
- The program is closed, and Treasury expects it will result in a positive return for taxpayers.

How does the AIG Investment work?

The Federal Reserve loans to AIG were carried out through the Federal Reserve Bank of New York (“FRBNY”) under section 13(3) authority of the Federal Reserve Act to lend on a secured basis under “unusual and exigent” circumstances to companies that are not depository institutions:

- In September 2008, the FRBNY provided an \$85 billion credit facility to AIG, subsequently reduced to \$60 billion, and received shares which currently have approximately 79.8% of the voting rights of the common stock in AIG. The FRBNY created a trust to hold the shares that exists for the benefit of the U.S. Treasury – but, the Department of the Treasury does not control the trust and cannot direct its trustees.
- In December 2009, the Federal Reserve received preferred equity interests in two special purpose vehicles (“SPVs”) formed to hold the outstanding stock of AIG’s largest foreign insurance subsidiaries, American International Assurance Company (“AIA”) and American Life Insurance Company (“ALICO”), in exchange for a \$25 billion reduction in the balance outstanding and maximum credit available under AIG’s revolving credit facility with the FRBNY. The transactions positioned AIA and ALICO for initial public offerings or sale.

Treasury’s investment in AIG was made under EESA authority:

- In November 2008, Treasury purchased \$40 billion in Series D preferred stock from AIG, subsequently exchanged in April 2009, for face value plus accrued dividends, into \$41.6 billion of Series E preferred stock.
- In April 2009, Treasury also created an equity capital facility, under which AIG may draw up to \$29.8 billion as needed in exchange for issuing additional shares of Series F preferred stock to Treasury. The Series E and Series F preferred stock pay a non-cumulative dividend of ten percent per year.
- As of May 31, 2010, AIG has drawn \$7.54 billion from the equity capital facility.
- On April 1, 2010, Treasury exercised its right to appoint two directors to the AIG board of directors. Treasury had the right to appoint directors because AIG failed to pay dividends for four quarters on the preferred stock held by Treasury.

What is the Automotive Industry Financing Program (AIFP)?

- The Automotive Industry Financing Program (AIFP) was developed in December 2008 to prevent a significant disruption of the U.S. automotive industry, because the potential for such a disruption posed a systemic risk to financial market stability and would have had a negative effect on the economy. Short-term funding was initially provided to General Motors (GM) and Chrysler on the condition that they develop plans to achieve long-term viability. In cooperation with the Administration, GM and Chrysler developed satisfactory viability plans and successfully conducted sales of their assets to new entities in bankruptcy proceedings. Chrysler’s sale process was completed in 42 days and GM’s was completed in 40 days. Treasury provided additional assistance during the respective periods.
- Treasury has provided approximately \$80 billion in loans and equity investments to GM, GMAC (now known as Ally Financial Inc.), Chrysler, and Chrysler Financial. The terms of Treasury’s assistance impose a number of restrictions including rigorous executive compensation standards, limits on luxury expenditures and other corporate governance requirements.

- In the related Auto Supplier Support Program (ASSP), Treasury provided loans to ensure that auto suppliers receive compensation for their services and products, regardless of the condition of the auto companies that purchase their products.
- As scheduled, the ASSP closed in April 2010 after full repayment of all loans provided under the program.

Chrysler

- In January 2009, Treasury loaned \$4 billion to Chrysler to give it time to implement a viable restructuring plan. On March 30th, the Administration determined that the business plan submitted by Chrysler failed to demonstrate viability and announced that in order for Chrysler to receive additional taxpayer funds, it needed to find a partner. Chrysler made the determination that forming an alliance with Fiat was the best course of action for its stakeholders.
- Treasury continued to support Chrysler as it formed an alliance with Fiat. In May and June 2009, Treasury (i) provided an additional \$1.9 billion to Chrysler LLC (Old Chrysler) under a debtor-in-possession financing agreement for assistance during its bankruptcy proceeding, (ii) provided a \$6.6 billion loan commitment to Chrysler Group LLC (New Chrysler) and (iii) received a 9.9% equity ownership in New Chrysler.
- With respect to Old Chrysler, on April 30, 2010, following the bankruptcy court's approval of a Plan of Liquidation, the \$1.9 billion debtor-in-possession loan was extinguished and the assets remaining with Old Chrysler, including collateral security attached to the loan, were transferred to a liquidation trust. Treasury retained the right to recover the proceeds from the liquidation of the specified collateral, but does not expect a significant recovery from the liquidation proceeds.
- With respect to the original \$4 billion loan made to CGI Holding LLC, the owner of Chrysler Financial and Old Chrysler, (i) the loan went into default when Old Chrysler filed for bankruptcy in April 2009, (ii) \$500 million of debt was assumed by New Chrysler in July 2009, and (ii) Treasury accepted a settlement payment of \$1.9 billion as satisfaction in full of all existing debt obligations of CGI Holding in May 2010. The final repayment, while less than face value, was significantly more than Treasury had previously estimated to recover following the bankruptcy and greater than independent valuation of the loan provided by Keefe, Bruyette and Woods, Treasury's adviser for the transaction.
- With respect to New Chrysler, Treasury's remaining investments consist of 9.9% of common equity and a \$7.1 billion loan (including undrawn commitments and the \$500 million assumed from Chrysler Holding).
- New Chrysler currently has the following ownership: Chrysler Voluntary Employee Benefit Association (VEBA) (67.7%), Fiat (20%), Treasury (9.9%) and the Government of Canada (2.5%).

Chrysler Financial

- On January 16, 2009, Treasury announced that it would lend up to \$1.5 billion to a special purpose vehicle (SPV) created by Chrysler Financial to enable the company to finance the purchase of Chrysler vehicles by consumers.
- To satisfy the EESA warrant requirement, the Chrysler Financial SPV issued additional notes entitling Treasury to an amount equal to five percent of the maximum loan amount. Twenty percent of those notes vested upon the closing of the transaction, and additional notes were to vest on each anniversary of the transaction closing date. The loan was fully drawn by April 9, 2009.
- On July 14, 2009, Chrysler Financial fully repaid the loan, including the vested additional notes and interest.

General Motors

- On December 31, 2008, Treasury agreed to loan \$13.4 billion to General Motors Corporation (GM or Old GM) to fund working capital. Under the loan agreement, GM was also required to implement a viable restructuring plan. The first plan GM submitted failed to establish a credible path to viability, and the deadline was extended to June 1 for GM to develop an amended plan. Treasury loaned an additional \$6 billion to fund GM during this period. To achieve an orderly restructuring, GM filed for bankruptcy on June 1, 2009. Treasury provided \$30.1 billion under a debtor-in-possession financing agreement to assist GM during the bankruptcy.
- The new entity, General Motors Company (New GM), began operating on July 10, 2009, following its purchase of most of the assets of Old GM. When the sale to New GM was completed on July 10, Treasury converted most of its loans to 60.8% of the common equity in the New GM and \$2.1 billion in preferred stock. Treasury continued to hold \$6.7 billion in outstanding loans.
- In December 2009, New GM began quarterly repayments of \$1.0 billion on its \$6.7 billion loan from Treasury. And in January 2010, New GM and Treasury amended the loan agreement to require cash that New GM held in an escrow account to be applied to repay the loan by June 30, 2010. After New GM repaid Treasury \$1 billion on March 31, 2010, the outstanding loan balance fell to approximately \$4.7 billion, all of which was repaid in April 2010 from the escrowed funds.
- New GM currently has the following ownership: Treasury (60.8%), GM Voluntary Employee Benefit Association (VEBA) (17.5%), the Canadian Government (11.7%), and Old GM's unsecured bondholders (10%). As part of the restructuring, GM issued warrants to acquire shares of common stock to VEBA and Old GM (for eventual distribution to the creditors of Old GM following liquidation).

Ally Financial Inc./GMAC

- In December 2008, Treasury purchased \$5 billion in senior preferred equity from GMAC LLC, and received an additional \$250 million in preferred shares through warrants that Treasury exercised at closing. At the same time, Treasury also agreed to lend up to \$1 billion of TARP funds to GM (one of GMAC's owners) for the purchase of additional ownership interests in GMAC's rights offering. GM drew \$884 million under that commitment in January 2009, and then in May 2009, Treasury exercised its option to exchange that loan for 35.4% of common membership interests in GMAC.
- In May 2009, regulators required GMAC to raise additional capital by November 2009 in connection with the SCAP. On May 21, 2009, Treasury purchased \$7.5 billion of convertible preferred shares from GMAC and also received warrants that Treasury exercised at closing for an additional \$375 million in convertible preferred shares, which enabled GMAC to partially meet the SCAP requirements. Additional Treasury investments in GMAC were contemplated to enable GMAC to satisfy the SCAP requirements.
- On December 30, 2009, Treasury:
 - Invested an additional \$3.8 billion in GMAC, consisting of \$2.54 billion of trust preferred securities (TRUPs), which are senior to all other capital securities of GMAC, and \$1.25 billion of Mandatorily Convertible Preferred Stock (MCP), and received warrants, which were immediately exercised, to purchase an additional \$127 million of TRUPs and \$63 million of MCP;
 - Converted \$3 billion of its existing MCP, which was purchased in May 2009, into common stock;
 - Exchanged \$5.25 billion of preferred stock into MCP; and
 - For the conversion price of the MCP to common stock, acquired a "reset" for an adjustment in 2011, if beneficial to Treasury, based on the market price of GMAC's private capital transactions occurring in 2010.
- As a result of the December 2009 transactions, Treasury's equity ownership of GMAC increased from 35 percent to 56.3 percent and Treasury holds \$11.4 billion of MCP and \$2.7 billion of TRUPs in GMAC. Treasury has the right to appoint two additional directors to the GMAC Board of Directors, so that four of nine directors will be appointed by Treasury.
- Ally Financial Inc. remains subject to the executive compensation and corporate governance requirements of Section 111 of EESA, as amended, and to the oversight of the Special Master for TARP Executive Compensation.

Consumer and Business Lending Initiatives**What is the Community Development Capital Initiative (CDCI)?**

Treasury has released the final program terms and forms of agreements for the new Community Development Capital Initiative, originally announced in October 2009, to invest lower-cost capital in Community Development Financial Institutions (CDFIs) that operate in markets underserved by traditional financial institutions. CDFIs are banks, thrifts, bank holding companies, savings and loan holding companies and credit

unions that target more than 60 percent of their small business lending and other economic development activities to low- and moderate-income communities.

Key program terms include:

- CDFIs will be eligible to receive capital investments of up to 5 percent of risk-weighted assets (3.5 percent of total assets for credit unions).
- CDCI participants will pay dividends to Treasury at a rate of 2 percent per annum, compared to the 5 percent under the CPP, increasing to 9 percent after eight years.
- Consistent with the use of TARP funds to promote financial stability and protect the taxpayer, CDFIs will need approval from their primary regulator to participate in this program. In cases where a CDFI might not otherwise be approved by its regulator, it will be eligible to participate so long as it can raise enough private capital that – when matched with Treasury capital up to 5 percent of risk-weighted assets (RWA) – it can reach viability.
- CDFIs participating in the Capital Purchase Program are eligible to exchange the CPP investment into the CDCI program.
- CDFIs that participate in the program will not be required to issue warrants so long as they receive \$100 million or less in total TARP funding.

Additional details are available at <http://www.FinancialStability.gov/roadtostability/comdev.html>

What is the Small Business and Community Lending Initiative – SBA 7a Securities Purchase Program?

To ensure that credit flows to entrepreneurs and small business owners, Treasury has taken measures to complement the Administration's actions to help small businesses recover and grow, including a program to purchase SBA guaranteed securities ("pooled certificates"). Treasury has developed a pilot program to purchase SBA guaranteed securities from one pool assembler, which began operations in March 2010.

Additional details are available at <http://www.FinancialStability.gov/roadtostability/smallbusinesscommunityinitiative.html>

What is the Term Asset-Backed Securities Loan Facility (TALF)?

- The Term Asset-Backed Securities Loan Facility is a lending facility operated by the Federal Reserve Bank of New York. The FRBNY provided term non-recourse loans collateralized by AAA-rated asset-backed securities (ABS) backed by new or recently originated auto loans, student loans, credit card loans, equipment loans, floor plan loans, insurance premium finance loans, residential mortgage servicing advances, or commercial mortgage loans, including legacy commercial mortgage loans, as well as collateralized by loans guaranteed by the Small Business Administration. Treasury provided credit support for TALF as part of Treasury's Consumer and Business Lending Initiative.
- Under TALF, investors requested the FRBNY to make loans secured by eligible consumer ABS, small business ABS, or commercial mortgage backed securities (CMBS) on fixed days each month. Assuming that the borrower and the security (ABS or CMBS) it planned to pledge as collateral met FRBNY's requirements, the investor received the requested funding. Most borrowers used the loan, together with their own funds, to purchase the ABS that serves as collateral for the TALF loans.

- If the borrower does not repay the loan, the FRBNY will enforce its rights in the collateral and sell the collateral to a special purpose vehicle (SPV) established specifically for the purpose of purchasing and managing such assets. The SPV is funded, in part, by a \$20 billion subordinated loan commitment from Treasury.
- On August 17, 2009, Treasury and the FRBNY announced the extension of the TALF for newly-issued ABS and legacy CMBS through March 31, 2010. In addition, TALF will make loans against newly issued CMBS through June 30, 2010. There were no further additions to the types of collateral eligible for the TALF.
- The TALF for newly issued ABS and legacy CMBS expired in March 2010, and the TALF for newly issued CMBS expired in June 2010.

What is the Legacy Securities Public-Private Investment Program (S-PPIP)?

- The Legacy Securities Public-Private Investment Program is designed, in part, to support market functioning and facilitate price discovery in the commercial and non-agency residential mortgage-backed securities (MBS) markets, helping banks and other financial institutions re-deploy capital and extend new credit to households and businesses. Both residential and commercial MBS are pools of mortgages bundled together by financial institutions. Rights to receive a portion of the cash generated by the pools are sold as securities in the financial markets, in the same way a stock or bond would be sold in financial markets. The term “legacy assets” generally refers to loans, asset-backed securities, and other types of assets that were originated or issued before the financial markets for these types of assets deteriorated significantly in 2008.
- The Public-Private Investment Program was announced as part of the Financial Stability Plan, which also originally included a program for legacy loans that would be administered by the FDIC.
- In the latter months of 2009, financial market conditions improved, the prices of legacy securities appreciated, and the results of the Supervisory Capital Assessment Program enabled banks to raise substantial amounts of capital as a buffer against weaker than expected economic conditions, all of which enabled Treasury to proceed with the S-PPIP program at a scale smaller than initially envisioned.

How does the S-PPIP work?

- Treasury partners with selected fund managers to purchase commercial and non-agency residential and commercial MBS. Treasury provides equity as well as debt financing to investment partnerships formed by the fund managers; the maximum equity obligation to a PPIF is expected to be \$1.11 billion and the maximum debt obligation to a PPIF is expected to be \$2.22 billion (before giving effect to any re-allocation of capital). Treasury will invest one-half of the total equity committed to the partnership; the remainder must be raised by the fund manager from private sector sources. Treasury's loan will earn interest and must be repaid at the end of the life of the fund.
- The nine firms that Treasury had pre-qualified in July 2009 to participate as fund managers have completed initial closings and begun operations of Public-Private Investment Funds (PPIFs). Treasury has committed (but not yet funded all of) of \$1.11 billion of equity capital together with \$2.22 billion of debt financing to each PPIF, while total Treasury equity and debt investment in all PPIFs will equal approximately \$30 billion. Following an initial closing, each PPIF has the opportunity to conduct additional closings over the following six months and to receive matching Treasury equity and debt financing for such additional closings.

- The equity investment, together with warrants received by Treasury, ensures that if these PPIFs perform well, the U.S. Treasury, and thus the taxpayer, will benefit from the upside of the performance alongside private investors.
- Treasury carefully designed the S-PPIP terms to protect the interests of taxpayers. Fund managers may not acquire assets from or sell assets to their affiliates or any other PPIF fund manager or private investor that has committed at least ten percent of the aggregate private capital raised by such fund manager. Fund managers must submit regular monthly reports about assets purchased, assets disposed, asset values, and profits and losses. Due to the possibility of actual or potential conflicts of interest inherent in any market-based investment program, fund managers also must agree to abide by ethical standards and conflicts of interest and compliance rules and a process for ensuring adherence to these rules developed by Treasury. In developing these requirements, Treasury worked closely with, among others, the staff of the SIGTARP and the Federal Reserve.

Who are the S-PPIP Fund Managers?

- Following a comprehensive two-month application, evaluation, and selection process, during which Treasury received over 100 unique applications to participate in the S-PPIP, in July 2009 Treasury pre-qualified the following firms to participate as fund managers in the program: AllianceBernstein, LP and its sub-advisors Greenfield Partners, LLC and Rialto Capital Management, LLC; Angelo, Gordon & Co., L.P. and GE Capital Real Estate; BlackRock, Inc.; Invesco Ltd.; Marathon Asset Management, L.P.; Oaktree Capital Management, L.P.; RLJ Western Asset Management, LP; The TCW Group, Inc., (subsequently terminated, see below); and Wellington Management Company, LLP.
- The fund managers for the PPIFs have established relationships with small, minority-, and women-owned businesses. Partner firms have roles including involvement in managing the investment portfolio and cash management services, raising capital from private investors, providing trading related-services, identifying investment opportunities, and providing investment and market research and other advisory services to the PPIFs.
- In December 2009, a fund managed by The TCW Group, Inc., was liquidated because TCW terminated the employment of individuals who were “Key Persons” responsible for making the investment decisions as set forth under the Limited Partnership Agreement for the TCW PPIF. Only \$513 million of total capital had been funded. Treasury's debt and equity capital investments were repaid in full, and Treasury realized a positive return of approximately \$20.6 million on its equity investment of \$156.3 million. Private investors were offered the option to re-allocate their underfunded capital commitments and proceeds from the TCW PPIF liquidation to any of the eight other PPIFs.
- In March 2010, commitments for \$44.5 million in direct equity investments were reallocated from TCW PPIF investors to specific PPIF fund managers and the remaining \$3.2 billion in commitments to the TCW PPIF were reallocated to the other eight PPIF fund managers.

S-PPIP Quarterly Reports

- Treasury has undertaken to publish quarterly reports with a summary of PPIP capital activity, portfolio holdings and current pricing, and fund performance, which are available on the FinancialStability.gov website, and specifically:

- As of March 31, 2010, at <http://www.financialstability.gov/docs/External%20Report%20-%2003-10%20Final.pdf>
- As of December 31, 2009, at <http://www.financialstability.gov/docs/External%20Report%20-%2012-09%20FINAL.pdf>.
- The second quarterly report was issued in April 2010. As of March 31, 2010, the participating PPIP fund managers had raised an aggregate of \$6.3 billion in private capital for the Public-Private Investment Funds (PPIFs). Together with equity and debt financing provided by Treasury, these PPIFs had \$25.1 billion in total funds available to acquire legacy mortgage-backed and other asset-backed securities.

What is the Home Affordable Modification Program (HAMP)?

- The Home Affordable Modification Program, part of Making Home Affordable (MHA), was first announced by the Obama Administration in February 2009 as part of its Financial Stability Plan.
- Using TARP funds, Treasury provides incentives for mortgage servicers, borrowers and investors to modify loans that are delinquent or at imminent risk of default to an affordable monthly payment equal to no more than 31 percent of a borrower's gross monthly income. Borrowers must be owner occupants, demonstrate the ability to support the reduced payment during a three-month trial, and submit required documentation before the modification becomes permanent.
- Homeowners participating in HAMP work with HUD-certified housing counselors and mortgage servicers. HAMP is designed to give up to 3 to 4 million homeowners an opportunity to reduce their monthly mortgage payments to more affordable levels.
- HAMP includes both GSE and non-GSE mortgages. GSE stands for "government sponsored enterprise," and in this report refers to Fannie Mae and Freddie Mac. Up to \$50 billion of TARP funds will be used to encourage the modification of non-GSE mortgages that financial institutions own and hold in their portfolios (whole loans) and mortgages held in private-label securitization trusts.
- Servicers must enter into the Servicer Participation Agreements with Treasury on or before October 3, 2010. Servicers for loans that are owned or securitized by GSEs are required to participate in the related GSE's HAMP for their portfolio of GSE loans. The incentives for these GSE HAMP modifications are funded by the related GSEs from their own resources.
- Borrowers may be accepted into HAMP if a borrower has made the first trial period payment on or before December 31, 2012. Modification interest rates are locked for five years from the start date of the modification. Incentive payments to investors and borrowers will continue to be paid out over that period for up to five years, and incentive payments to servicers for up to three years. At the end of five years, the reduced interest rate will increase by one percent per year until it reaches the cap, which is the market rate at the time the trial period began. The capped rate is fixed for the life of the loan.
- Details on the Home Affordable Modification Program are available at <http://www.FinancialStability.gov/roadtostability/homeowner.html> and at <http://www.MakingHomeAffordable.gov>.

What are the additional components of HAMP and MHA?

- The **Home Price Decline Protection Program (HPDP)** is a component of HAMP, and the Second Lien Modification Program (2MP) and the Home Affordable Foreclosure Alternatives Program (HAFA) are components of MHA. The HPDP provides additional incentive payments for modifications on properties located in areas where home prices have declined. The purpose of the program is to encourage additional lender participation and HAMP modifications in areas hardest hit by falling home prices and ensure that borrowers in those areas have the opportunity to stay in their homes, thereby minimizing foreclosures, which further depress home values.
- The **Second Lien Modification Program (2MP)** provides incentives for second-lien holders to modify or extinguish a second-lien mortgage when a modification has been initiated on the first lien mortgage for the same property under HAMP.
- The **Home Affordable Foreclosure Alternatives Program (HAFA)** simplifies and streamlines the use of short sale or deed-in-lieu options by incorporating financial incentives to borrowers, servicers, and investors. The program also ensures pre-approved short sale terms prior to listing the property on the market and requires that borrowers be fully released from future liability for the debt.

HAMP Enhancements for Unemployed Homeowners and Principal Write-Downs

- In March 2010, the Obama Administration announced enhancements to the Home Affordable Modification Program that will provide temporary mortgage assistance to some unemployed homeowners, encourage servicers to write-down mortgage debt as part of a HAMP modification, allow more borrowers to qualify for modification through HAMP, and help borrowers move to more affordable housing when modification is not possible.¹ Revised Supplemental Directives to implement these enhancements to HAMP and can be found at <https://www.hmpadmin.com/portal/programs/directives.html>.² See “Temporary Assistance for Unemployed Homeowners While They Search for Re-Employment and Modification of Loans with Principal Reduction Alternative” below.

FHA Program Adjustments to Support Refinancings for Underwater Homeowners

- In March, the Obama Administration announced the FHA Program Adjustments to Support Refinancings for Underwater Homeowners, which will permit participating lenders to provide additional refinancing options to homeowners who owe more than their home is worth because of large declines in home prices.³
- The FHA Refinance option should be available by the fall of 2010. Treasury and FHA expect to issue detailed guidelines on the respective elements for the FHA Refinance Option.

¹ Further information, including the HAMP Improvements Fact Sheet, is available at http://www.FinancialStability.gov/latest/pr_03262010.html

² A listing of all Supplemental Directives, and links to PDF versions of each Supplemental Directive, can be found at <https://www.hmpadmin.com/portal/programs/directives.html>.

³ See the FHA Refinance Fact Sheet available at http://MakingHomeAffordable.gov/docs/FHA_Refinance_Fact_Sheet_032510%20FINAL2.pdf.

- TARP funds will be made available up to an estimated \$14 billion to provide incentives to support the write-downs of second liens and encourage participation by servicers, and to provide additional coverage for a share of potential losses on these loans.

Servicer performance

- To ensure transparency and servicer accountability, servicer-specific results are publicly reported on a monthly basis. The MHA Monthly Servicer Performance Reports can be found at <http://www.FinancialStability.gov/latest/reportsanddocs.html>, which as of June 2010 is incorporated in the monthly Housing Scorecard released by the U.S. Department of Housing and Urban Development, and available at www.hud.gov/scorecard.
- In January 2010, MHA released updated guidance for servicer documentation requirements in order to expedite conversions of current trial modifications to permanent status. This guidance also implemented an important program improvement for future trial period plans by requiring servicers to fully validate borrower financial information before offering a trial plan. In addition, servicers are allowed additional time in certain circumstances to retrieve documentation from applicants, notify applicants of any missing documents, and resolve any disputes over applications.
- In May 2010, the Administration outlined for servicers its plans to begin reporting more detailed performance measures. This reporting will include the eight largest servicers and will focus on servicer compliance, program execution, and homeowner experience. Reporting will include the following:

Servicer Compliance with Program Guidelines

- Results of servicer-level loan-file reviews assessing whether loan files were appropriately evaluated
- Identification of all compliance activities performed for servicers and of areas for future compliance focus

Program Execution

- Average time from start of trial modification to start of permanent modification
- Servicer implementation timelines for program updates
- Information about alternatives made available to homeowners ineligible for HAMP
- Information about alternatives made available to homeowners who fall out of HAMP trial modifications, such as non-HAMP modifications, payment plans, and short sales

Homeowner Experience

- Servicer handling of calls from homeowners (speed to answer, hang-up rates)
- Time it takes to resolve homeowner problems that have been reported by third parties such as housing counselors, attorneys, and congressional and other government offices
- Servicer share of homeowner complaints to the Homeowner's HOPE™ Hotline

Temporary Assistance for Unemployed Homeowners While They Search for Re-Employment and Modification of Loans with Principal Reduction Alternative

In May 2010, Treasury released *Supplemental Directive (SD) 10-04 - Home Affordable Unemployment Program (UP)*, a supplemental program to HAMP that provides assistance to unemployed borrowers and in June 2010, Treasury released *SD 10-05 - Home Affordable Modification Program – Modification of Loans with Principal Reduction Alternative*, as implementation of HAMP program enhancements announced in March.

- The Unemployment Program requires servicers to grant qualified unemployed borrowers a forbearance period to have their mortgage payments temporarily reduced for a minimum of three months while they look for a new job. If a homeowner does not find a job before the temporary assistance period is over or if they find a job with a reduced income, they will be evaluated for a permanent HAMP modification or may be eligible for HAMP's alternatives to the foreclosure program.
- Servicers are prohibited from initiating foreclosure action or conducting a foreclosure sale while the borrower is being evaluated for UP, after a foreclosure plan notice is mailed, during the UP forbearance or extension, and while the borrower is being evaluated for or participating in HAMP or HAFA following the UP forbearance period. Servicers will not be reimbursed by the TARP for any costs associated with the UP, and there will be no cost to government or taxpayers from the forbearance plans.
- SD 10-05 provides guidance to servicers on a Principal Reduction Alternative (PRA). Under PRA, servicers are required to evaluate the benefit of principal reduction and are encouraged to offer principal reduction whenever the net present value (NPV) result of a HAMP modification using PRA is greater than the NPV result without considering principal reduction. SD 10-05 also provides that the 2MP program will now require principal reduction in an amount at least proportional to any principal reduction offered on a corresponding HAMP modified first lien mortgage loan.

Compliance and second look

- The HAMP Compliance Program is designed to ensure that servicers satisfy their obligations under HAMP requirements in order to provide a well-controlled program that assists as many deserving homeowners as possible to retain their homes while taking reasonable steps to prevent fraud, waste and abuse. Freddie Mac acts as Treasury's Compliance Agent for HAMP through MHA-C, which is a separate, independent division that conducts these compliance activities. Treasury works closely with MHA-C to design and refine the Compliance Program and conducts quality assessments of the activities performed by MHA-C.
- Compliance activities of MHA-C include on-site reviews, file reviews and reviews of net present value (NPV) model applications. Please see Appendix B of the Servicer Performance Report Through May 2010 (included in Appendix 2) for further information.
- Following these reviews, MHA-C provides Treasury with assessments of each servicer's compliance with HAMP requirements. If appropriate, Treasury will implement remedies for non-compliance. These remedies may include withholding or reducing incentive payments to servicers, requiring repayments of prior incentive payments made to servicers with respect to affected loans, or requiring additional servicer oversight.
- In the Servicer Performance Report Through May 2010 highlighted areas of compliance focus based on MHA-C assessments of each servicer's compliance with HAMP requirements provided to Treasury, included: (1) borrower solicitation; (2) underwriting documentation; (3) NPV model

usage; (4) document processing and control; (5) IR2 data maintenance; and (6) governance.

Updates to Servicer Certification Requirements

- In May 2010, Treasury's compliance agent, Fannie Mae, informed servicers, all of whom are required per their Servicer Participation Agreement (SPA) to submit annual certifications stating their continued compliance with the HAMP program terms, that Treasury is in the process of updating the certification requirements, and clarified the reporting period and deadlines for such certifications. The submission date for certifications due under SPA signed on or before October 31, 2009 will be September 30, 2010 in respect of the period ending on June 30, 2010, with similar staggered periods for servicers who entered HAMP on later dates. *Supplemental Directive 10-06 – Guidance on Annual Servicer Certification Required by the Servicer Participation Agreement*, with specific guidance regarding the certification requirements for servicers, was released in June.

Housing Finance Agency Innovation Funds for the Hardest Hit Housing Markets**What is the First Hardest Hit Fund (HHF)?**

In February 2010, the Obama Administration announced funding for innovative measures to help address the housing problems facing those states that have suffered an average home price drop of more than 20 percent from their respective peak of the housing bubble.

- \$1.5 billion of investment authority under EESA will be available to work with state Housing Finance Agencies (HFAs) to tailor housing assistance to local needs.
- California, Florida, Arizona, Michigan, and Nevada, states where house prices have fallen more than 20% from their peak are eligible for this funding. Funds will be allocated among eligible states according to a formula based on home price declines and unemployment.
- HFAs must submit program designs to Treasury so that Treasury can evaluate the program's compliance with EESA requirements. All funded program designs are posted online at <http://www.FinancialStability.gov/roadtostability/hardesthitfund.html>.
- To receive funding, programs must satisfy the requirements for funding under EESA. These requirements include that the recipient of funds must be an eligible financial institution and that the funds must be used to pay for programs designed to prevent avoidable foreclosures and other permitted uses under EESA.

- In March 2010, Treasury announced the allocations of funds among the states and published guidelines for HFA proposal submissions. Set forth below is a summary of the methodology used to determine calculations:

	Housing Price Decline		Unemployment			Number of delinquent loans in Q4 2009	Weighted number of delinquent loans	Weighted share of delinquent loans in these states	Allocation (\$mm)
	Housing price decline from peak	Ratio relative to largest decline	December 2009 unemployment rate	Ratio relative to highest unemployment rate	Sum of ratios (State's weight)				
Nevada	-49.9%	1.00	13.0%	0.89	1.9	62,622	118,382	6.9%	\$102.8
California	-38.9%	0.78	12.4%	0.85	1.6	494,640	805,978	46.6%	\$699.6
Florida	-37.4%	0.75	11.8%	0.81	1.6	309,022	481,558	27.9%	\$418.0
Arizona	-36.8%	0.74	9.1%	0.62	1.4	105,853	144,073	8.3%	\$125.1
Michigan	-24.1%	0.48	14.6%	1.00	1.5	120,030	178,000	10.3%	\$154.5
Total									\$1,500.0

- On June 23, 2010, Treasury approved state plans for use of the \$1.5 billion in the first HHF foreclosure-prevention programs in Arizona, California, Florida, Michigan, and Nevada.
 - These programs are designed to provide relief to struggling homeowners as soon as practicable. The specific implementation and timing will depend on the types of programs offered, specific state-level procurement procedures, compliance readiness and other factors.
 - The approved proposals include programs to assist struggling homeowners with negative equity through principal reduction; assist the unemployed or under-employed make their mortgage payments; facilitate the settlement of second liens; facilitate short sales and/or deeds-in-lieu of foreclosure; and assist in the payment of arrearages.

What is the Second Hardest Hit Fund?

In March 2010, the Obama Administration announced an expansion of the initiative to target additional states with high shares of their populations living in local areas of concentrated economic distress.

- The second HFA Hardest-Hit Fund will include up to \$600 million in funding for innovative measures to help families stay in their homes or otherwise avoid foreclosure in five states that have areas of concentrated economic distress. The \$600 million in funds is equivalent on a per person basis to the \$1.5 billion awarded in the first HFA Hardest-Hit Fund.
- While the first HFA Hardest-Hit Fund targeted five states affected by home price declines greater than 20 percent, the second HFA Hardest-Hit Fund targets states with the highest concentration of their population living in counties with unemployment rates greater than 12 percent, on

average over the months of 2009.⁴ The five states that will receive allocations based on this criterion are: North Carolina, Ohio, Oregon, Rhode Island, and South Carolina. Set forth below is a summary of the methodology used to determine calculations:

State	State Totals		Economic Distress	Allocation	
	State Population in 2009	Population Living in High Unemp Counties	% of State Pop Living in High Unemp Counties	% of Total Pop in High Unemp Counties for Top 5 States	Allocation Cap (\$millions)
Rhode Island	1,053,209	627,690	60%	7%	\$43
South Carolina	4,561,242	2,022,492	44%	23%	\$138
Orgeon	3,825,657	1,281,675	34%	15%	\$88
North Carolina	9,380,884	2,332,246	25%	27%	\$159
Ohio	11,542,645	2,514,678	22%	29%	\$172
Total					\$600

- To receive funding, programs must satisfy the requirements for funding under EESA. These requirements include that the recipient of funds must be an eligible financial institution and that the funds must be used to pay for programs designed to prevent avoidable foreclosures and other permitted uses under EESA.
- The objective of the HHF program is to develop creative, effective approaches to the housing crisis that consider local conditions. Treasury has outlined some of the possible types of transactions that would meet EESA requirements:
 - Assistance to unemployed borrowers to help them avoid foreclosure; modifications of mortgage loans held by HFAs or other financial institutions or incentives for servicers/investors to modify loans; mortgage modifications with principal forbearance by paying down all or a portion of an overleveraged loan and taking back a note from the borrower for that amount in order to facilitate additional modifications; assistance with short sales and deeds-in-lieu of foreclosure to prevent avoidable foreclosures; incentives for financial institutions to write-down a portion of unpaid principal balance for homeowners with severe negative equity; or incentives to reduce or modify second liens.

Other innovative ideas and transaction types (including innovations related to the existing “Making Home Affordable” programs) will be evaluated on a case-by-case basis for compliance with EESA.

- Treasury will ensure accountability and transparency of the HFA Hardest-Hit Fund program: all funded program designs and effectiveness metrics will be posted online and program activity will be subject to oversight under EESA.

⁴ States that were allocated funds under the first HHF program are not eligible for the second HHF program.

Office of the Special Master for TARP Executive Compensation**What is the scope of the Special Master's review?**

- In June 2009, Treasury published the Interim Final Rule (the “Rule”) on TARP Standards for Compensation and Corporate Governance, promulgated under the EESA as amended by the American Recovery and Reinvestment Act of 2009. The Rule contains distinct requirements for recipients of TARP funding under certain programs, including CPP participants and recipients of exceptional financial assistance. The exceptional assistance recipients currently include the following firms: AIG, Ally Financial (formerly GMAC), Chrysler, and GM. Bank of America and Citigroup ceased to be exceptional assistance recipients upon their respective repayments of TARP obligations arising from exceptional assistance programs in December 2009. As detailed below, Chrysler Financial ceased to be an exceptional assistance recipient in May 2010, when its remaining TARP obligations for purposes of the Rule were extinguished.
- The Rule created the Office of the Special Master and provided the Special Master with specific powers designed to ensure that executive pay at these firms is in line with long-term value creation and financial stability. These include:
 - *Review of Payments:* Each recipient of exceptional assistance must obtain the Special Master’s approval of compensation structures, including payments made pursuant to those structures, for the senior executive officers and 20 next most highly paid employees (“Top 25”);
 - *Review of Structures:* Each recipient of exceptional assistance must obtain the Special Master’s approval of compensation structures for all executive officers and the 100 most highly compensated employees (“Covered Employees 26 – 100”);
 - *Interpretation:* The Special Master has interpretive authority over the executive compensation provisions of EESA and the Interim Final Rule, and authority to make all determinations as to the application of those provisions to particular facts; and
 - *Prior Payments:* The “lookback” provision (i.e., Section 111(f)) of EESA requires a review of bonuses, retention awards, and other compensation paid to the senior executive officers and 20 next most highly compensated employees of each recipient of TARP assistance before February 17, 2009, in order for the Special Master to determine whether the payments were contrary to the public interest. If a payment is determined to be contrary to the public interest, the Special Master will be responsible for negotiating reimbursements of such payments. In March 2010, the Special Master issued a letter to 419 TARP participants together with a *Compensation Review Data Request Form* for each TARP participant to provide information to aid the Special Master in his administration of the lookback provision. Under the Rule, this information was required to be provided in April 2010.
- The Rule also requires that the compensation committee, CEO, and CFO, of each TARP recipient provide certain certifications to Treasury with respect to compliance with the Rule. These certifications are due within 90 days (in the case of the CEO and CFO certifications) or 120 days (in the case of the compensation committee) of the completion of the TARP recipient’s fiscal year.
- In addition to the executive compensation requirements, all TARP recipients were required to adopt a luxury expenditure policy consistent with the requirements of the Rule, provide the policy to Treasury, and post the policy on their Internet website, in each case within 90 days following

publication of the Rule (or, if later, 90 days following the closing date of the agreement between the TARP recipient and Treasury). These policies are generally required to address expenses including entertainment or other events, office and facility renovations, and aviation or other transportation services.

Determinations for the Top 25 Employees

- In October 2009, the Office of the Special Master for TARP Executive Compensation released determinations on the compensation packages for the Top 25 at the seven firms that were then exceptional assistance recipients.⁵ The Office of the Special Master generally rejected the companies' initial proposals for these Top 25 executives and approved a modified set of compensation structures with the following features:
 - Cash salaries generally no greater than \$500,000, with the remainder of compensation in equity, mostly in the form of vested "stock salary," which executives must hold until 2011, after which it can be transferred in three equal, annual installments (subject to acceleration of one year upon the company's repayment of federal assistance).
 - Annual incentives payable in "long-term restricted stock," which is forfeited unless the employee provides three years of service after it is granted, in amounts determined based on objective performance criteria. Actual payment of the restricted stock is subject to the company's repayment of TARP funds (the stock may be paid in 25% installments for each 25% of TARP obligations that are repaid).
 - \$25,000 limit on perquisites and "other" compensation, absent special justification.
 - No further accruals or company contributions to executive pension and retirement programs.
- In March 2010, the Office of the Special Master issued rulings for the 2010 compensation for the Top 25 executives at the five firms that were then exceptional assistance recipients: AIG, Chrysler, Chrysler Financial, GM, and GMAC. The rulings have the following general features:
 - Decreased total cash compensation by 33 percent compared to the cash compensation these individual executives received in 2009;
 - Reduced total compensation at AIG, GMAC, and Chrysler Financial by 15 percent compared to the pay these executives received in 2009; and
 - Kept cash salaries at \$500,000 or less, other than in exceptional cases.

Determinations for the Covered Employees 26 - 100

- In December 2009, the Special Master issued determinations on the compensation structures for Covered Employees 26-100 at each of the six firms that were then exceptional assistance recipients. Unlike the October rulings, which addressed specific amounts payable to the Top 25 executives, Treasury regulations require the Special Master only to address compensation structures for Covered Employees 26 – 100. These determinations covered four companies: AIG, Citigroup, GM, and GMAC. Chrysler and Chrysler Financial were (with the exception of one

⁵ Copies of the determination letters and information on executive compensation is available at: <http://www.FinancialStability.gov/about/executivecompensation.html>.

employee) not required to obtain the Special Master's approval during this round because total pay for each executive did not exceed the \$500,000 "safe harbor" limitation in Treasury's compensation regulations. .

- The 2009 compensation structures approved by the Special Master for the Covered Employees 26 –100 have the following general features:
 - Short-term cash compensation is restricted. Cash salaries are generally limited to \$500,000 other than in exceptional cases, and overall cash is limited in most cases to 45% of total compensation in cash. All other pay must be in company stock;
 - Incentive compensation without real achievement of performance is forbidden. Total incentives are limited to a fixed pool, incentive payments may be made only if objective goals are achieved, and all such payments must be subject to "clawback" if results prove illusory;
 - Compensation structures must have a long-term focus. In most cases, at least 50 percent of total compensation must be held for three years, at least 50 percent of incentive pay must be granted in long-term stock, and any cash incentives must be delivered over at least two years—single, lump-sum cash bonuses are not permitted; and
 - Pay practices that are not aligned with shareholder and taxpayer interests, such as golden parachutes, supplemental executive retirement benefits, excessive perquisites and tax gross-ups are frozen or forbidden.
- In April 2010, the Office of the Special Master issued rulings for 2010 compensation structures for Covered Employees 26-100 at the five remaining firms receiving exceptional assistance. These rulings reaffirmed that the principles and requirements of the 2009 determinations for Covered Employees 26-100 must continue to apply in 2010.
- In addition to determinations for the Top 25 Employees and Covered Employees 26-100 groups, the Special Master has issued supplemental determinations from time to time, including determinations approving pay packages for the new chief executive officer of GMAC and the new chief financial officer of GM. The pay packages approved by the Special Master for the newly hired executives generally conform to the principles and structures of the regular determinations. All the Special Master's determinations are available at the website below.

Effects of TARP Repayment

- Prior to the Special Master's issuance of determinations for the Covered Employees 26–100 groups, Bank of America repaid its TARP obligations. As a result, the compensation structures for Bank of America's Covered Employees 26–100 were no longer subject to the Special Master's review, and no determination in that regard was issued. Payments to Bank of America's Top 25 relating to service prior to the repayment, however, remain subject to the Special Master's October 2009 determinations.
- After the Special Master issued determinations for the Covered Employees 26–100 groups, Citigroup repaid certain TARP obligations, and ceased to be an "exceptional assistance recipient" for purposes of the Rule. As a result, Special Master approval is not required for future compensation structures and payments to Citigroup executives. Payments and compensation structures for Citigroup's Top 25 and Covered Employees 26–100 relating to service prior to the repayment, however, remain subject to the Special Master's October and December 2009

determinations, respectively. The executive compensation restrictions that apply to TARP recipients that are not “exceptional assistance recipients” will continue to apply to Citigroup until it extinguishes its remaining TARP obligations.

- Chrysler Financial fully repaid its loan from Treasury in July 2009 (prior to the Special Master’s initial determinations), but remained an exceptional assistance recipient because its affiliates still had outstanding TARP obligations under an exceptional assistance program. The remaining obligations at affiliate companies were extinguished for purposes of the Rule in May 2010, upon Treasury’s acceptance of a settlement payment as satisfaction in full of all existing debt obligations of Chrysler Financial’s parent, CGI Holding LLC. As a result, Special Master approval is not required for future compensation structures and payments to Chrysler Financial executives. Payments and compensation structures for Chrysler Financial’s Top 25 and Covered Employees 26 – 100 relating to service prior to the payment, however, remain subject to the Special Master’s previous determinations.

How Treasury Exercises Its Voting Rights

- Treasury is a shareholder in General Motors, Chrysler, Ally Financial (formerly GMAC) and Citigroup. The Obama Administration has stated that core principles will guide Treasury’s management of financial interests in private firms. One such principle is that the United States government will not interfere with or exert control over day-to-day company operations and, in the event that the government obtains ownership interests, it will vote only on key governance issues. These core principles also include Treasury’s commitment to seek to dispose of its ownership interests as soon as practicable. Treasury will follow these principles in a manner consistent with the obligation to promote the liquidity and stability of the financial system.
- Treasury does not participate in the day-to-day management of any company in which it has an investment nor is any Treasury employee a director of any such company. Treasury’s investments have generally been in the form of non-voting securities or loans. For example, the preferred shares that Treasury holds in financial institutions under the Capital Purchase Program do not have voting rights except in certain limited circumstances, such as amendments to the charter of the company, or in the event dividends are not paid for several quarters, in which case Treasury has the right to elect two directors to the board.
- Treasury has announced that it will follow the following principles in exercising its voting rights: (1) Treasury intends to exercise its right to vote only on certain matters consisting of the election or removal of directors; certain major corporate transactions such as mergers, sales of substantial amounts of assets, and dissolution; issuances of equity securities where shareholders are entitled to vote; and amendments to the charter or bylaws; (2) on all other matters, Treasury will either abstain from voting or vote its shares in the same proportion (for, against or abstain) as all other shares of the company’s stock are voted.
- For public companies such as Citigroup, Treasury has entered into an agreement in which these principles are set forth. For private companies such as GM, Ally and Chrysler, Treasury follows the principles voluntarily or as set forth in a stockholder agreement. In GM, they are largely reflected as terms following an initial public offering (IPO).
- In the case of AIG:

- The U.S. Treasury is the beneficiary of a trust created by the Federal Reserve Bank of New York (FRBNY). That trust owns shares having 79.8% of the voting rights of the common stock. The FRBNY has appointed three independent trustees who have the power to vote on the stock and dispose of the stock with prior approval of FRBNY and after consultation with Treasury. The trust agreement provides that the trustees cannot be employees of Treasury or the FRBNY. The trust exists for the benefit of the U.S. Treasury, and the Department of the Treasury does not control the trust and it cannot direct the trustees.

- Treasury owns preferred stock in AIG which does not have voting rights except in certain limited circumstances (such as amendments to the charter). Treasury has the right to appoint directors because AIG failed to pay dividends for four quarters on the preferred stock held by Treasury. On April 1, 2010, Treasury exercised its right to appoint two directors to the American International Group, Inc. (AIG) board of directors.

Appendix 2

Housing Scorecard and Servicer Performance Report

The Obama Administration's Efforts To Stabilize The Housing Market and Help American Homeowners

U.S. Department of Housing and Urban Development | U.S. Department of the Treasury

The Administration's goal is to promote stability for both the housing market and homeowners. To meet these objectives, the Administration developed a broad approach implementing state and local housing agency initiatives, tax credits for homebuyers, neighborhood stabilization and community development programs, mortgage modifications and refinancing, continued FHA engagement, and support for Fannie Mae and Freddie Mac. In addition, Federal Reserve and Treasury MBS purchase programs have helped to keep mortgage interest rates at record lows over the past year. More detail on the Administration's efforts can be found in the Appendix.

Overall Impact of Administration's Comprehensive Housing Initiative

The President's housing market recovery efforts began immediately after taking office in February 2009. The Administration's comprehensive response, as outlined above, has yielded many positive impacts:

- Home price performance has improved. After 30 straight months of decline and an expectation of continued significant deterioration, home prices have leveled off in the past year and expectations have adjusted upward. Homeowners have benefitted from the stabilization, as owner equity has increased by over \$1 trillion since the first quarter of 2009
- More than 2.5 million first time homebuyers have purchased a home using the First-Time Homebuyer Tax credit, helping to stabilize home sales and prices and increase affordability.
- Mortgages are now more affordable. Due to historically low interest rates, more than 6 million homeowners have refinanced, saving an estimated \$150 per month on average and more than \$11 billion in total.
- Servicers report that the number of homeowners receiving restructured mortgages since April 2009 has increased to 2.8 million. This includes more than 1.2 million homeowners who have started HAMP trial modifications and nearly 400,000 who have benefitted from FHA loss mitigation activities. Of those in the HAMP program, 346,000 have entered a permanent modification saving a median of more than \$500 per month. In addition, HUD-approved mortgage counselors have assisted 3.6 million families.
- Based on newly available survey data, nearly half of homeowners unable to enter a HAMP permanent modification enter an alternative modification with their servicer, and fewer than 10 percent of cancelled trials move to foreclosure sale. Link to see MHA report: <http://www.financialstability.gov/docs/May%20MHA%20Public%20062110.pdf>

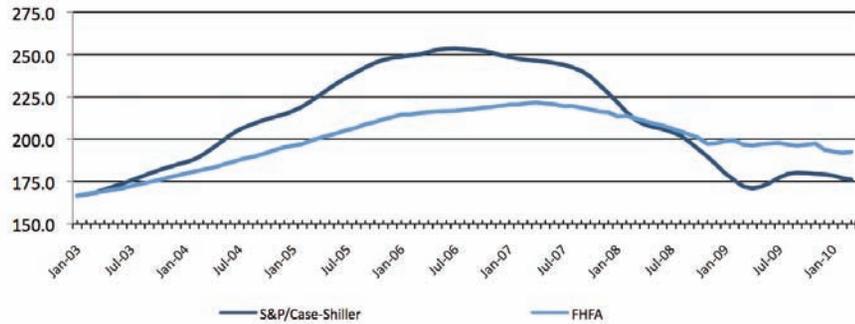

The Administration's housing initiatives were intended to help prevent avoidable foreclosures and stabilize the housing market. However the foreclosure prevention initiatives were not designed to help every borrower and the housing market will continue to adjust for some time.

- Investors and speculators are not protected under the Administration's efforts, nor are Americans living in million dollar homes, defaulters on vacation homes, or those who don't meet their responsibilities for qualification. This month, HAMP cancellations are high because many borrowers who received temporary modifications were not able to meet eligibility requirements such verifying their income and successfully making trial payments.
- The supply of homes on and off market remains near all-time highs. It will take time to work through this large inventory.

SOURCES AND METHODOLOGY

B. Notes on Charts.

1. Monthly house price trends shown as changes in respective house price indices applied to a base price in January 2008 set to equal the median price of an existing home sold in January 2008 as reported by the National Association of Realtors. Indices shown: S&P/Case Shiller 20-metro composite index, January 2000 = 100, and FHFA monthly (purchase-only) index for US, January 1991 = 100.
2. S&P/Case-Shiller Index as reported monthly. Futures index figures report forward expectations of house prices reflected by the market as of the date indicated.
3. Reported seasonally adjusted annual rates for new and existing home sales divided by 12.
4. HUD estimate of refinance originations based on MBA estimate of dollar volume of refinance originations.
5. Cumulative HAMP modifications started, FHA loss mitigation and early delinquency interventions, plus proprietary modifications completed as reported by Hope Now Alliance.
6. Foreclosure starts include notice of default and lis pendens, completions are properties entering REO. Both as reported by Realty Trac.
7. See "Borrower Annual Savings" above.
8. FHA market shares as FHA purchase and refinance originations divided by HUD estimates of purchase and refinance mortgage originations as noted in "Mortgage Originations" above.

The Obama Administration's Efforts To Stabilize The Housing Market and Help American Homeowners

Appendix

The Administration has taken a broad set of actions to stabilize the housing market and help American homeowners. A year ago, stress in the financial system had severely reduced the supply of mortgage credit, limiting the ability of Americans to buy homes or refinance mortgages. Millions of responsible families who had made their monthly payments and had fulfilled their obligations saw their property values fall. They also found themselves unable to refinance at lower mortgage rates.

In February 2009, less than one month after taking office, President Obama announced the Homeowner Affordability and Stability Plan. As part of this plan and through other housing initiatives, the Administration has taken the following actions to strengthen the housing market:

- Supported to Fannie Mae and Freddie Mac to ensure continued access to affordable mortgage credit;
- The Federal Reserve and the U.S. Treasury purchased more than \$1.4 trillion in agency mortgage backed securities through independent MBS purchase programs, helping to keep mortgage rates at historic lows;
- Launched a modification initiative to help homeowners reduce mortgage payments to affordable levels and to prevent avoidable foreclosures;
- Launched a \$23.5 billion Housing Finance Agencies Initiative to increase sustainable homeownership and rental resources;
- Supported the First Time Homebuyer Tax Credit, which has helped 2.5 million American families purchase homes;
- Provided more than \$5 billion in support for affordable rental housing through low income housing tax credit programs and \$2 billion in support for the Neighborhood Stabilization Program through the Recovery Act to restore neighborhoods hardest hit by concentrated foreclosures;
- Created the \$2.1 billion HFA Hardest Hit Fund for innovative foreclosure prevention programs in the nation's hardest hit housing markets.
- Supported home purchase and refinance activity through the FHA to provide access to affordable mortgage capital and help homeowners prevent foreclosures.

###

Making Home Affordable Program

Servicer Performance Report Through May 2010

Report Highlights

Nearly 350,000 Homeowners Granted Permanent Modifications

- Total number of permanent modifications increases more than 15%, with growth in permanent modifications averaging more than 50,000 per month over the last four months.
- Homeowners in permanent modifications are experiencing a median payment reduction of 36%, more than \$500 per month.
- Homeowners in permanent modifications are guaranteed lower payments for five years, then fixed terms at today's low rates for the life of the loan.

Servicers Continue to Work Through Aged Trial Population

- Cancellations rise as servicers comply with Treasury guidance to make decisions on aged trials. Of the new canceled trials this month, more than 70% had been in trial six months or longer.
- Most homeowners in canceled trials become current on mortgage payments or enter an alternative modification, according to servicers.
- Common causes of cancellations include borrowers who had mortgage payments already less than 31% of their income, missed trial payments or had incomplete or unverifiable documentation.

New This Month: Disposition Path of Canceled Trials

- According to servicer data, nearly half of homeowners unable to enter a HAMP permanent modification enter an alternative modification with their servicer.
- Fewer than 10% of canceled trials move to foreclosure sale, servicers report.

New This Month: Description of Compliance Activities

- Making Home Affordable-Compliance disagreed with servicer actions in just 3.9% of Second Look reviews.
- Compliance places continued focus on borrower solicitation and document retention.

	Active Permanent Modifications	340,459

¹ Estimated eligible 60+ day delinquent loans as reported by servicers as of April 30, 2010, include conventional loans:

- in foreclosure and bankruptcy.
- with a current unpaid principal balance less than \$729,750 on a one-unit property, \$934,200 on a two-unit property, \$1,129,250 on a three-unit property and \$1,403,400 on a four-unit property.
- on a property that was owner-occupied at origination.
- originated on or before January 1, 2009.

Estimated eligible 60+ day delinquent loans exclude:

- FHA and VA loans.
- loans that are current or less than 60 days delinquent, which may be eligible for HAMP if a borrower is in imminent default.

Refer to the Waterfall of Eligible Borrowers on page 7 for further explanation.

For servicers enrolling after March 1, 2010 that did not participate in the 60+ day delinquency survey, the delinquency count is from the servicer registration form.

² The estimated eligible 60+ day delinquent borrowers are those in HAMP-eligible loans, minus estimated exclusions of loans on vacant properties, loans with borrower debt-to-income ratio below 31%, loans that fail the NPV test, properties no longer owner-occupied, manufactured housing loans with title/chattel issues that exclude them from HAMP, and loans where the investor pooling and service agreements preclude modification. Exclusions for DTI and NPV results are estimated using market analytics.

Refer to the Waterfall of Eligible Borrowers on page 7 for further explanation.

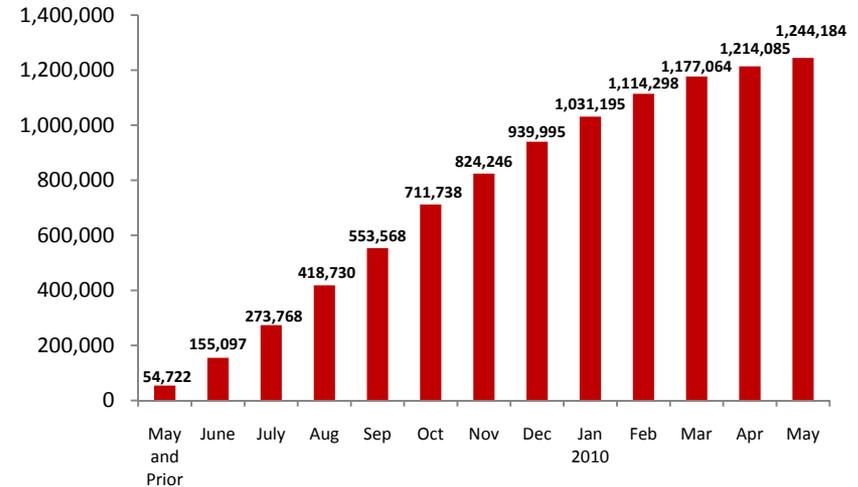

³ As reported in the weekly servicer survey through May 27, 2010.

⁴ Servicers may enter new trial modifications anytime before the loan converts to a permanent modification.

⁵ Includes 124 loans paid off.

Making Home Affordable Program

Servicer Performance Report Through May 2010

Modification Characteristics

- Lower monthly mortgage payments for borrowers in active trial and permanent modifications represent a cumulative reduction of more than \$3.1 billion.
- The median savings for borrowers in permanent modifications is \$514.31, or 36% of the median before-modification payment.

Permanent Modifications by Modification Step

Interest Rate Reduction	100%
Term Extension	53.7%
Principal Forbearance	28.8%

Select Median Characteristics of Permanent Modifications

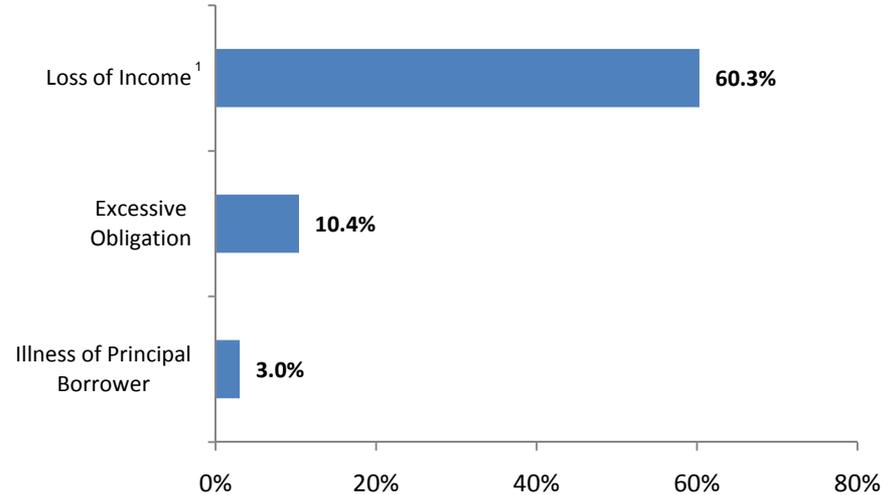

Loan Characteristic	Before Modification	After Modification	Median Decrease
Front-End Debt-to-Income Ratio ¹	44.8%	31.0%	-13.9 pct pts
Back-End Debt-to-Income Ratio ²	79.8%	63.8%	-14.4 pct pts
Median Monthly Payment ³	\$1,425.53	\$836.85	-\$514.31

¹ Ratio of housing expenses (principal, interest, taxes, insurance and homeowners association and/or condo fees) to monthly gross income.

² Ratio of total monthly debt payments (including mortgage principal and interest, taxes, insurance, homeowners association and/or condo fees, plus payments on installment debts, junior liens, alimony, car lease payments and investment property payments) to monthly gross income. Borrowers who have a back-end debt-to-income ratio of greater than 55% are required to seek housing counseling under program guidelines.

³ Principal and interest payment.

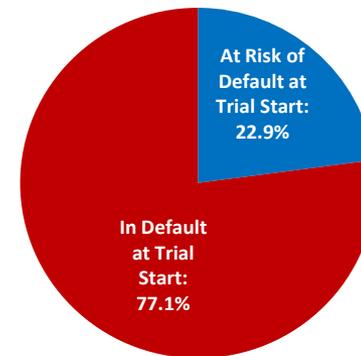

Predominant Hardship Reasons for Permanent Modifications

¹ Includes borrowers who are employed but have faced a reduction in hours and/or wages as well as those who have lost their jobs.

Note: Does not include 17.6% of permanent modifications reported as Other.

Loan Status Upon Entering Trial

Note: For all trial modifications started.

“At Risk of Default” includes borrowers up to 59 days delinquent at trial entry as well as those in imminent default. “In Default” refers to borrowers 60 or more days late at trial entry.

Estimated eligible 60+ day delinquent borrowers excludes:

- Those in FHA and VA loans.
- Those in loans that are current or less than 60 days delinquent, which may be eligible for HAMP if a borrower is in imminent default.
- Those borrowers with debt-to-income ratios less than 31% or a negative NPV test.
- Owners of vacant properties or properties otherwise excluded (see footnotes of page 7 for further explanation).

Exclusions for DTI and NPV are estimated using market analytics.

For servicers enrolling after March 1, 2010 that did not participate in the

60+ day delinquency survey, the delinquency count is from the servicer registration form.

² As reported in the weekly servicer survey through May 27, 2010.

³ Active trial and permanent modifications as reported into the HAMP system of record by servicers. Subject to adjustment based on servicer reconciliation of historic loan files.

⁴ Bank of America, NA includes Bank of America, NA, BAC Home Loans Servicing LP, Home Loan Services and Wilshire Credit Corporation.

⁵ J.P. Morgan Chase Bank, NA includes EMC Mortgage Corporation.

⁶ Formerly National City Bank.

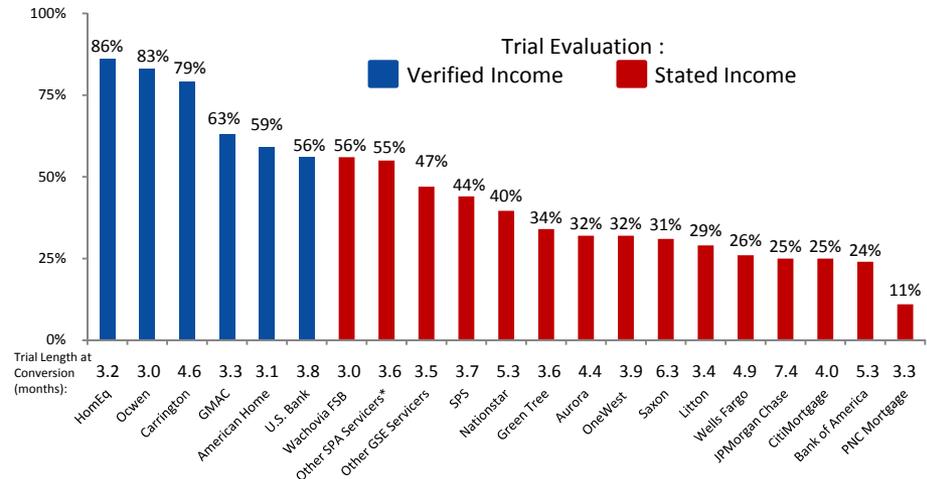

⁷ Wachovia Mortgage, FSB consists of Pick-a-Payment loans.

⁸ Wells Fargo Bank, NA includes a portion of the loans previously included in Wachovia Mortgage, FSB.

⁹ Other SPA servicers are entities with less than 5,000 estimated eligible 60+ day delinquent borrowers that have signed participation agreements with Treasury and Fannie Mae. A full list of participating servicers is in the Appendix.

¹⁰ Includes servicers of loans owned or guaranteed by Fannie Mae and Freddie Mac.

Conversion Rate¹

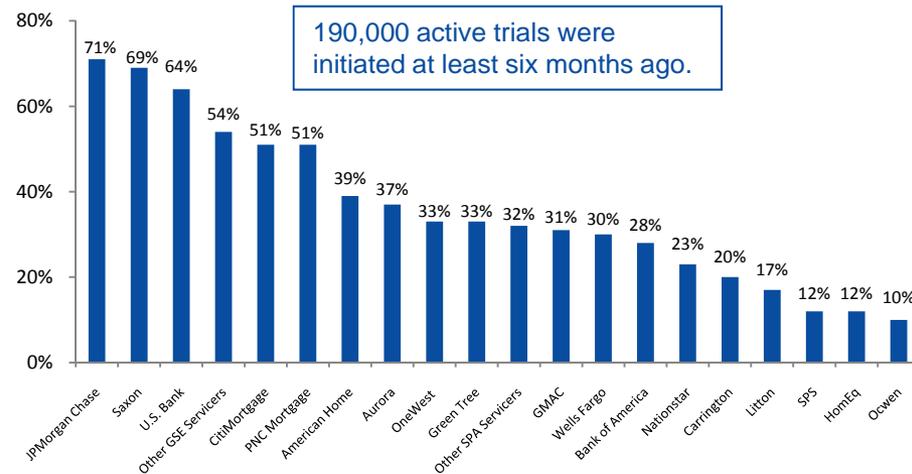

¹ As measured against trials eligible to convert – those three months in trial, or four months if the borrower was in imminent default.

* Other SPA and Other GSE servicers represent a mix of verified and stated income trial starts.

Note: Per program guidelines, all servicers will use verified income before starting trial modifications by June 1.

Permanent modifications transferred among servicers are credited to the originating servicer.

Aged Trials¹ as Share of Active Trials

¹ Active trials initiated at least six months ago.

Note: Excludes Wachovia Mortgage, FSB at 0%.

Making Home Affordable Program

Servicer Performance Report Through May 2010

Results of Compliance Second-Look Reviews (Dec. 2009)

Making Home Affordable-Compliance (MHA-C) conducts Second Look^{1,2} reviews of homeowners that were not solicited or evaluated for HAMP modifications to ensure that the servicer's actions were appropriate. In 3.9% of the cases, MHA-C disagreed with the servicer's actions.

¹Bank of America NA, Wells Fargo NA, CitiMortgage Inc. and GMAC Mortgage Inc. were not part of the December 2009 rotation for Second Look reviews.

²Second Look Results are derived of a statistical sample of loan files for borrowers not offered a HAMP modification (typically 150 loan files).

³ Cases where the borrower was not appropriately solicited or evaluated for HAMP.

⁴ Cases where MHA-C was unable to determine if the servicer's actions were appropriate.

The results of these reviews help determine the types of other compliance activities and frequency with which those activities will be performed. In addition, these reviews help determine if further actions are required, including requiring servicers to: reevaluate disagrees and hold off foreclosures until disagrees are reevaluated; submit further documentation to clarify loan status for the "Unable to Determine" population; engage in process remediation, training, or policy clarification; or take other actions as directed by MHA-C and Treasury.

Ongoing Compliance Focus

Based on Making Home Affordable-Compliance (MHA-C) efforts to date, HAMP compliance efforts will prioritize the following areas:

• Borrower Solicitation:

- Servicers are required to solicit eligible borrowers without delay
- Servicers are prohibited from conducting foreclosure proceedings until eligible borrowers are appropriately considered for HAMP
- Servicers must ensure that their operating protocols identify all populations of eligible borrowers

• Underwriting Documentation:

- Servicers must retain complete and consistent documentation for all loans considered for HAMP
- Documentation must support all decisions (e.g., denials, permanent modifications, etc.) made by the servicer
- Servicers' internal quality assurance departments are required to play an active role in the ongoing evaluation of underwriting procedures and related documentation

Please see Appendix B for a detailed description of compliance activities.

Percentage to Goal of 3-4 Million Modification Offers by 2012 ²	38-50%

¹ Source: survey data provided by servicers. Servicers are encouraged by HAMP to solicit information from borrowers 60+ days delinquent, regardless of eligibility for a HAMP modification.

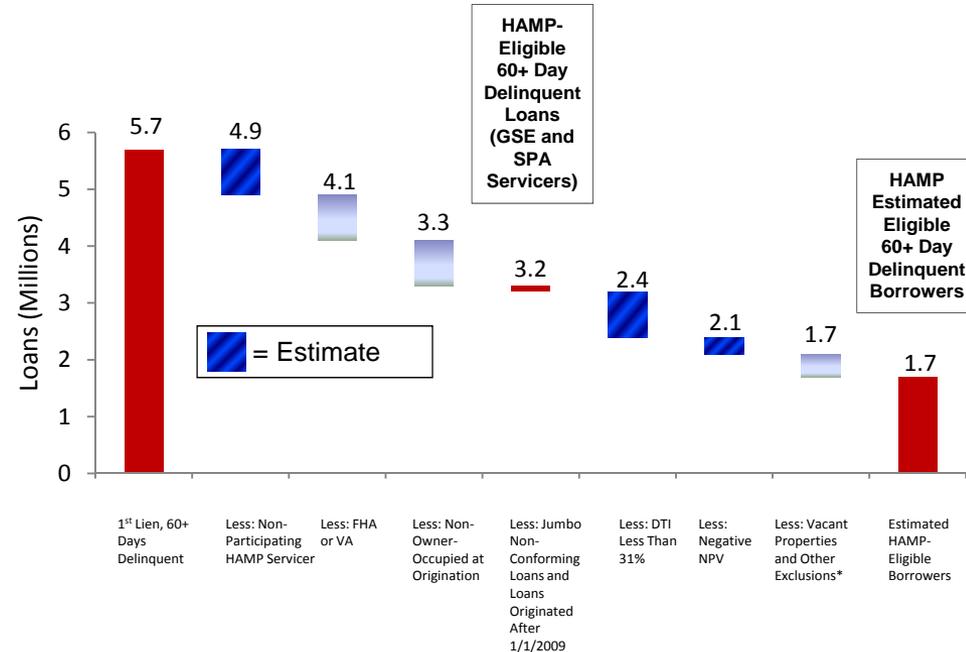

² In 2009, Treasury set a goal of offering help to 3-4 million borrowers through the end of 2012, as measured by trial plan offers extended to borrowers.

Call Center Volume

	Cumulative	May
Total Number of Calls Taken at 1-888-995-HOPE (since program inception)	1,165,237	104,936
Borrowers Receiving Free Housing Counseling Through the Homeowner's HOPE™ Hotline	591,235	45,917

Waterfall of HAMP-Eligible Borrowers

Not all 60-day delinquent loans are eligible for HAMP. Other characteristics may preclude borrower eligibility. Based on the estimates, of the 5.7 million borrowers who were 60 days delinquent in the 1st quarter of 2010, 1.7 million borrowers are eligible for HAMP. As this represents a point-in-time snapshot of the delinquency population and estimated HAMP eligibility, we expect that more borrowers will become eligible for HAMP from now through 2012.

*Other exclusions include: no longer owner-occupied; investor's pooling and servicing agreement precludes modification; and manufactured housing loans with titling/chatel issues that exclude them from HAMP.

*Note: Effective this month, this estimate will be updated quarterly, coinciding with the release of new total delinquency numbers from the Mortgage Bankers Association.

Sources: Fannie Mae; monthly survey of participating servicers for April 30, 2010. Total 60+ delinquent figure from 1st Quarter MBA delinquency survey. Excluded loans are as reported by servicers by survey who have signed a servicer participation agreement for HAMP.

Making Home Affordable Program

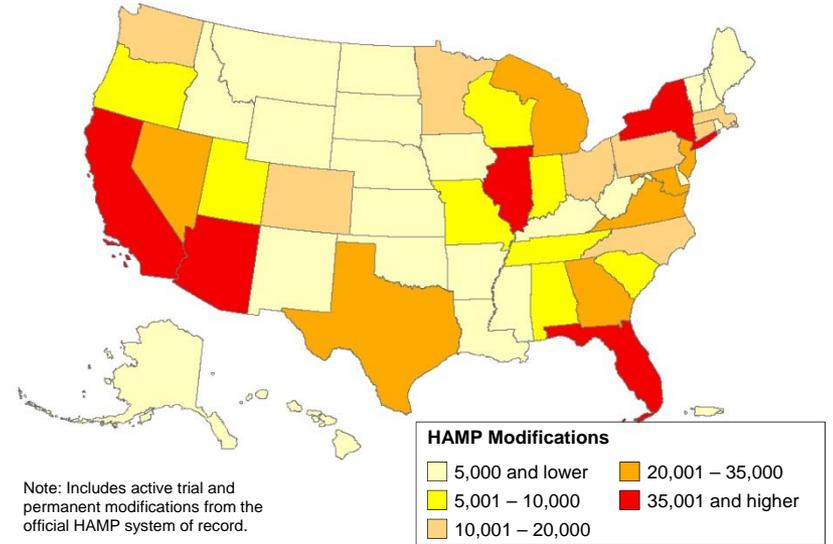

Servicer Performance Report Through May 2010

Appendix B: Description of Compliance Activities

Description of Compliance Activities

Freddie Mac, serving as Compliance Agent for Treasury's Home Affordable Modification Program (HAMP), has created a separate division known as Making Home Affordable - Compliance (MHA-C). Using a risk-based approach, MHA-C conducts a number of different types of compliance activities to assess servicer compliance with HAMP guidelines, as described below.

On Site Reviews: Readiness & Governance – A review performed by MHA-C to assess the servicer's preparedness for complying with new/future HAMP requirements, or to research a trend or potential implementation risk. Reviews are performed as needed, determined by frequency of new program additions.

NPV – A review conducted by MHA-C to determine the servicer's adherence to the HAMP NPV guidelines. For those servicers that have elected to recode the NPV model into their own systems (recoders), the testing process is designed to ensure the servicer's NPV model is accurately calculating NPV and that the model usage is consistent with directives. At a minimum, recoders are subject to quarterly off-site testing and semi-annual for on-site reviews. For servicers using the Treasury NPV Web Portal, reviews of data submissions are performed on a monthly basis.

On Site Reviews: Implementation – A review conducted by MHA-C covering the servicer's overall execution of the HAMP program. Areas covered include, among other things, solicitation, eligibility, underwriting, document management, payment processing, reporting, and governance. Reviews are performed at a minimum for larger servicers on a semi-annual schedule and for smaller servicers on an annual schedule.

Loan File Review – A review performed by MHA-C of a servicer's non-performing loan portfolio primarily to assess completeness of relevant documentation and appropriate loan modification decisioning. This includes reviews of loans which have successfully converted to a permanent modification to ensure they meet the HAMP guidelines, as

well as loans that have not been offered HAMP modifications to ensure that the exclusion was appropriate ("Second Look"). Larger servicers are on an alternating permanent modifications and Second Look monthly loan file review cycle. These Loan File reviews consist of a statistical sample (typically 100- 150 loan files per larger servicer). Smaller servicers are also statistically sampled on a quarterly or semi-annual cycle.

Incentive Payments – A review performed by MHA-C to determine the accuracy and validity of borrower and investor incentive payments, and to assess whether borrower payments are appropriately allocated to borrowers' loan principal in accordance with HAMP guidelines. They are performed at a minimum annually on the top 21 servicers.

Areas of Compliance Focus

Based on the results of MHA-C's reviews to date and anticipated risks to the program, HAMP compliance efforts will remain focused on the following general areas:

Borrower Solicitation – Servicers are required to solicit eligible borrowers without delay and not conduct foreclosure proceedings until such borrowers are appropriately considered for HAMP. It is critical that servicers not take actions that would lead to borrowers becoming displaced from their home without being given proper consideration for a loan modification or other foreclosure alternative. Servicers should ensure that their operating protocols identify all populations of eligible borrowers. Servicers should ensure that their operating procedures meet or exceed the minimum requirements of Supplemental Directive 10-02 related to borrower solicitation and contact.

Underwriting Documentation – Servicers must retain a complete and consistent set of documentation for all loans considered for HAMP, including evidence supporting borrower income. In addition, appropriate documentation must support all decisions (e.g., denials, permanent modifications, etc.) made by the servicer. Servicers' quality

assurance departments are required, and expected, to play an active role in the ongoing evaluation of the servicers' underwriting process and related documentation.

NPV model usage – Servicers are required to utilize net present value (NPV) models that produce valid and accurate results. In order to eliminate adverse borrower outcomes from negative NPV results, servicers must hold required inputs constant between NPV tests. Servicers should regularly test their recoded NPV models against the Treasury NPV Portal to identify any anomalous or inaccurate results.

Document processing and control – Servicers must have policies and procedures that clearly describe document acquisition, tracking, and retention practices. Any potential for misplaced or lost documents should immediately be addressed so that timely decisions can be made for borrowers eligible for assistance under HAMP. In addition, servicers should ensure that proper training and education is provided for all parties involved in the document management life cycle, including those with responsibility for the servicers' document management technology.

IR2 Data Maintenance – Servicers are required to report timely and accurate information to the Program Administrator's IR2 data base. This information serves not only to measure HAMP's progress, but also as the authoritative source for incentive payments due to borrowers, servicers, and investors. Servicers should be conducting ongoing reviews of their reported data and be prepared to explain circumstances where data is either inconsistent or missing.

Governance – Servicers should ensure that a sound governance process exists for HAMP. An appropriate governance model begins with senior executive accountability and extends to formal policies and procedures for HAMP-related activities, including the development of comprehensive fraud prevention, fair lending, and quality assurance programs.

Total Purchase Amount * \$ 204,901,756,320

Total Repaid \$ 138,396,175,000

Total Warrant Proceeds \$ 5,774,221,118

Losses \$ (2,334,120,000)

TOTAL TREASURY CAPITAL PURCHASE PROGRAM (CPP) OUTSTANDING INVESTMENT AMOUNT \$ 64,171,461,320

* Total purchase amount includes the capitalization of accrued dividends referred to in Notes 20 and 22. Notes appear on the following page.

- 1a/ This transaction was included in previous Transaction Reports with Merrill Lynch & Co., Inc. listed as the qualifying institution and a 10/28/2008 transaction date, footnoted to indicate that settlement was deferred pending merger. The purchase of Merrill Lynch by Bank of America was completed on 1/1/2009, and this transaction under the CPP was funded
- 1b/ The warrant disposition proceeds amount are stated pro rata in respect of the CPP investments in Bank of America Corporation that occurred on 10/28/2008 and 1/9/2009. The total gross disposition proceeds from CPP warrants on 3/3/2010 was \$310,571,615, consisting of \$186,342,969 and \$124,228,646. Proceeds from the disposition of TIP warrants on 3/3/2010 appear on a following page of this report.
- 2/ Privately-held qualified financial institution; Treasury received a warrant to purchase additional shares of preferred stock (unless the institution is a CDFI), which it exercised immediately.
- 3/ To promote community development financial institutions (CDFIs), Treasury does not require warrants as part of its investment in certified CDFIs when the size of the investment is \$50 million or less.
- 3a/ Treasury cancelled the warrants received from this institution due to its designation as a CDFI.
- 4/ Repayment pursuant to Title VII, Section 7001(g) of the American Recovery and Reinvestment Act of 2009.
- 5/ Redemption pursuant to a qualified equity offering.
- 6/ This amount does not include accrued and unpaid dividends, which must be paid at the time of capital repayment.
- 7/ The proceeds associated with the disposition of this investment do not include accrued and unpaid dividends.
- 8/ Subchapter S corporation; Treasury received a warrant to purchase additional subordinated debentures (unless the institution is a CDFI), which it exercised immediately.
- 9/ In its qualified equity offering, this institution raised more capital than Treasury's original investment, therefore, the number of Treasury's shares underlying the warrant was reduced by half.
- 10/ This institution participated in the expansion of CPP for small banks.
- 10a/ This institution received an additional investment through the expansion of CPP for small banks.
- 11/ Treasury made three separate investments in Citigroup Inc. (Citigroup) under the CPP, Targeted Investment Program (TIP), and Asset Guarantee Program (AGP) for a total of \$49 billion. On 6/9/2009, Treasury entered into an agreement with Citigroup to exchange up to \$25 billion of Treasury's investment in Fixed Rate Cumulative Perpetual Preferred Stock, Series H (CPP Shares) "dollar for dollar" in Citigroup's Private and Public Exchange Offerings. On 7/23/2009 and 7/30/2009, Treasury exchanged a total of \$25 billion of the CPP shares for Series M Common Stock Equivalent ("Series M") and a warrant to purchase shares of Series M. On 9/11/2009, Series M automatically converted to 7,692,307,692 shares of common stock and the associated warrant terminated on receipt of certain shareholder approvals.
- 12/ On 8/24/2009, Treasury exchanged its Series C Preferred Stock issued by Popular, Inc. for a like amount of non tax-deductible Trust Preferred Securities issued by Popular Capital Trust III, administrative trustee for Popular, Inc. Popular, Inc. paid a \$13 million exchange fee in connection with this transaction.
- 13/ This institution converted to a bank holding company structure and Treasury exchanged its securities for a like amount of securities that comply with the CPP terms applicable to bank holding companies. The institution in which Treasury's original investment was made is shown in parentheses.
- 14/ As of the date of this report, this institution is in bankruptcy proceedings.
- 15/ For final disposition of warrants, "R" represents proceeds from a repurchase of warrants by the financial institution, and "A" represents the proceeds to Treasury, before underwriting fees and selling expenses, from a sale by Treasury in a registered public offering of the warrants issued by the financial institution.
- 16/ On 12/10/2009, the bankruptcy reorganization plan of CIT Group Inc. became effective and Treasury's preferred stock and warrant investment were extinguished and replaced by Contingent Value Rights (CVRs). On 2/8/2010, the CVRs expired without value as the terms and conditions for distribution of common shares to holders of CVRs were not met.
- 17/ On 12/11/2009, Treasury exchanged its Series A Preferred Stock issued by Superior Bancorp, Inc. for a like amount of non tax-deductible Trust Preferred Securities issued by Superior Capital Trust II, administrative trustee for Superior Bancorp.
- 18/ On 2/1/2010, following the acquisition of First Market Bank (First Market) by Union Bankshares Corporation (the acquiror), the preferred stock and exercised warrants issued by First Market on 2/6/2009 were exchanged for a like amount of securities of the acquiror in a single series but with a blended dividend rate equivalent to those of Treasury's original
- 19/ On 2/11/2010, Pacific Coast National Bancorp dismissed its bankruptcy proceedings with no recovery to any creditors or investors, including Treasury, and the investment was extinguished.
- 20/ On 3/8/2010, Treasury exchanged its \$84,784,000 of Preferred Stock in Midwest Banc Holdings, Inc. (MBHI) for \$89,388,000 of Mandatory Convertible Preferred Stock (MCP), which is equivalent to the initial investment amount of \$84,784,000, plus \$4,604,000 of capitalized previously accrued and unpaid dividends. Subject to the fulfillment by MBHI of the conditions related to its capital plan, the MCP may be converted to common stock.
- 21/ On 3/30/2010, Treasury exchanged its \$7,500,000 of Subordinated Debentures in GulfSouth Private Bank for an equivalent amount of Preferred Stock, in connection with its conversion from a Subchapter S-Corporation, that comply with the CPP terms applicable to privately held qualified financial institutions.
- 22/ On 4/16/2010, Treasury exchanged its \$72,000,000 of Preferred Stock in Independent Bank Corporation (Independent) for \$74,426,000 of Mandatory Convertible Preferred Stock (MCP), which is equivalent to the initial investment amount of \$72,000,000, plus \$2,426,000 of capitalized previously accrued and unpaid dividends. Subject to the fulfillment by Independent of the conditions related to its capital plan, the MCP may be converted to common stock.
- 23/ Treasury received Citigroup common stock pursuant to the June 2009 Exchange Agreement between Treasury and Citigroup which provided for the exchange into common shares of the preferred stock that Treasury purchased in connection with Citigroup's participation in the Capital Purchase Program (see note 11). On April 26, 2010, Treasury gave Morgan Stanley & Co. Incorporated (Morgan Stanley) discretionary authority as its sales agent to sell up to 1,500,000,000 shares of the common stock, which authority ended on May 26, 2010 upon completion of the sale. (See "Capital Purchase Program - Citigroup, Inc., Common Stock Disposition" on following page.) On May 26, 2010, Treasury again gave Morgan Stanley discretionary authority as its sales agent to sell up to 1,500,000,000 shares of the common stock from time to time during the period ending on June 30, 2010 (or on completion of the sale). Such sales will generally be made at the market price. Treasury will report the actual number of shares sold by Morgan Stanley, the weighted average price per share and the total proceeds to Treasury from such sales at the close of that period.
- 24/ On 4/29/2010, Treasury entered into an agreement with Sterling Financial Corporation (Sterling) to exchange Treasury's \$303,000,000 of Preferred Stock for an equivalent amount of Mandatory Convertible Preferred Stock (MCP). The closing of the exchange for MCP is subject to the receipt of regulatory and stockholder approvals. Subject to the fulfillment by Sterling of the conditions related to its capital plan, the MCP may be converted to common stock.
- 25/ As of the date of this report, the banking subsidiary of this institution has been placed in receivership and the subsidiary's assets and liabilities were ordered to be sold to another bank.
- 26/ On 5/18/2010, Treasury entered into an agreement with The Toronto-Dominion Bank for the sale of all Preferred Stock and Warrants issued by South Financial Group, Inc. to Treasury at an aggregate purchase price of \$130,179,218.75 for the Preferred Stock and \$400,000.00 for the Warrants. Completion of the sale is subject to the fulfillment of certain closing conditions.
- 27/ On 6/30/2010, Treasury exchanged \$46,400,000 of its Series A Preferred Stock in First Merchants Corporation for a like amount of non tax-deductible Trust Preferred Securities issued by First Merchants Capital Trust III.

**CAPITAL PURCHASE PROGRAM - CITIGROUP, INC.
COMMON STOCK DISPOSITION**

Date	Pricing Mechanism ³	Number of Shares	Proceeds ⁴
4/26/2010 - ¹ 5/26/2010	\$4.1217	1,500,000,000	\$ 6,182,493,158
5/26/2010 - ² 6/30/2010	\$3.8980	1,108,971,857	\$ 4,322,726,825

Total Proceeds: \$10,505,219,983

1/ On April 26, 2010, Treasury gave Morgan Stanley & Co. Incorporated (Morgan Stanley) discretionary authority, as its sales agent, to sell up to 1,500,000,000 shares of common stock from time to time during the period ending on June 30, 2010 (or upon completion of the sale). Completion of the sale under this authority occurred on May 26, 2010.

2/ On May 26, 2010, Treasury gave Morgan Stanley & Co. Incorporated (Morgan Stanley) discretionary authority, as its sales agent, to sell up to 1,500,000,000 shares of common stock from time to time during the period ending on June 30, 2010 (or upon completion of the sale). Completion of the sale under this authority occurred on June 30, 2010.

3/ The price set forth is the weighted average price for all sales of Citigroup, Inc. common stock made by Treasury over the course of the corresponding period.

4/ Amount represents the gross proceeds to Treasury.

Footnotes appear on following page.

As used in this table and its footnotes:

"GMAC" refers to GMAC Inc., formerly known as GMAC LLC.

"Old GM" refers to General Motors Corporation, which is now known as Motors Liquidation Company.

"New GM" refers to General Motors Company, the company that purchased Old GM's assets on 7/10/2009 in a sale pursuant to section 363 of the Bankruptcy Code. See also footnote 11.

"Chrysler FinCo" refers to Chrysler Financial Services Americas LLC.

"Chrysler Holding" refers to CGI Holding LLC, the company formerly known as "Chrysler Holding LLC".

"Old Chrysler" refers to Old Carco LLC (fka Chrysler LLC).

"New Chrysler" refers to Chrysler Group LLC, the company that purchased Old Chrysler's assets on 6/10/2009 in a sale pursuant to section 363 of the Bankruptcy Code.

1. Payment amount does not include accrued and unpaid interest on a debt obligation, which must be paid at the time of principal repayment.
2. Treasury committed to lend General Motors Corporation up to \$1,000,000,000. The ultimate funding was dependent upon the level of investor participation in GMAC LLC's rights offering. The amount has been updated to reflect the final level of funding.
3. Pursuant to its rights under the loan agreement with Old GM reported on 12/29/2008, Treasury exchanged its \$884 million loan to Old GM for a portion of Old GM's common equity interest in GMAC. Treasury held a 35.4% common equity interest in GMAC until the transactions reported on 12/30/2009. (See transactions marked by orange line in the table above and footnote 22.)
4. This transaction is an amendment to Treasury's 12/31/2008 agreement with Old GM (the "Old GM Loan"), which brought the total loan amount to \$15,400,000,000.
5. This transaction was a further amendment to the Old GM Loan, which brought the total loan amount to \$19,400,000,000.
6. This transaction was a further amendment to the Old GM Loan, which brought the total loan amount to \$19,760,624,198. The \$360,624,198 loan was used to capitalize GM Warranty LLC, a special purpose vehicle created by Old GM. On 7/10/2009, the principal amount was included in the \$7.07 billion of debt assumed by the new GM, as explained in footnote 10.
7. On 7/10/2009, the principal amount outstanding under the Old GM Loan and interest accrued thereunder were extinguished and exchanged for privately placed preferred and common equity in New GM. (See green lines in the table above.)
8. Under the terms of the \$33.3 billion debtor-in-possession credit agreement dated 6/3/2009 with Old GM (the "GM DIP Loan"), Treasury's commitment amount was \$30.1 billion. The remaining \$2.2 billion of the financing was provided by Canadian government entities. As of 7/09/2009, \$30.1 billion of funds had been disbursed by Treasury.
9. On 7/10/2009, Treasury and Old GM amended the GM DIP Loan, and the principal amount and interest accrued thereunder were extinguished and exchanged for privately placed preferred and common equity in New GM, except for (i) \$7.07 billion, which was assumed by New GM as a new obligation under the terms of a separate credit agreement between Treasury and New GM (see transactions marked by green lines in table above) and (ii) \$986 million, which remained a debt obligation of Old GM.
10. In total, for the exchange of the Old GM Loan and the GM DIP Loan (other than as explained in footnote 9), Treasury received \$2.1 billion in preferred shares and 60.8% of the common shares of New GM. (See transactions marked by green lines in the table above.)
11. Pursuant to a corporate reorganization completed on or about 10/19/2009, the shareholders of New GM, including with respect to Treasury's preferred and common stock, became shareholders of General Motors Holding Company (the ultimate parent company of New GM), which was renamed "General Motors Company" on an equal basis to their shareholdings in New GM, and New GM was converted to "General Motors LLC". General Motors LLC is a wholly owned subsidiary of General Motors Holdings LLC, and General Motors Holdings LLC is a wholly owned subsidiary of General Motors Company.
12. Pursuant to a corporate reorganization completed on 10/19/2009, Treasury's loan with New GM was assigned and assumed by General Motors Holdings LLC.
13. The loan was funded through Chrysler LB Receivables Trust, a special purpose vehicle created by Chrysler FinCo. The amount of \$1,500,000,000 represents the maximum loan amount. The loan was incrementally funded until it reached the maximum amount of \$1.5 billion on 4/9/2009.
14. This transaction was an amendment to Treasury's 1/2/2009 agreement with Chrysler Holding. As of 4/30/2009, Treasury's obligation to lend any funds committed under this amendment had terminated. No funds were disbursed.
15. The loan was used to capitalize Chrysler Warranty SPV LLC, a special purpose vehicle created by Old Chrysler.
16. This transaction was set forth in a credit agreement with Old Chrysler fully executed on 5/5/2009 following a term sheet executed on 5/1/2009 and made effective on 4/30/2009. Treasury's commitment was \$3.04 billion of the total \$4.1 billion debtor-in-possession credit facility (the "Chrysler DIP Loan"). As of 6/30/2009, Treasury's commitment to lend under the Chrysler DIP Loan had terminated. The remaining principal amount reflects the final amount of funds disbursed under the Chrysler DIP Loan.
17. This transaction was an amendment to Treasury's commitment under the Chrysler DIP Loan, which increased Treasury's commitment by an amount \$756,857,000 to a total of \$3.8 billion under the Chrysler DIP Loan. As of 6/30/2009, Treasury's obligation to lend funds committed under the Chrysler DIP Loan had terminated.
18. This transaction, first reported based on a term sheet fully executed on 5/27/2009 for an amount up to \$6.943 billion, was set forth in a credit agreement with New Chrysler fully executed on 6/10/2009. Under the terms of the credit agreement, Treasury made a new commitment to New Chrysler of up to \$6.642 billion. The total loan amount is up to \$7.142 billion including \$500 million of debt assumed on 6/10/2009 from Chrysler Holding originally incurred under Treasury's 1/2/2009 credit agreement with Chrysler Holding. The debt obligations are secured by a first priority lien on the assets of New Chrysler. When the sale to new Chrysler was completed, Treasury acquired the rights to 9.85% of the common equity in new Chrysler.
19. Pursuant to the agreement explained in footnote 18, \$500 million of this debt obligation was assumed by New Chrysler.
20. Under loan agreement, as amended on 7/23/2009, Treasury was entitled to proceeds Chrysler Holdco received from Chrysler FinCo equal to the greater of \$1.375 billion or 40% of the equity value of Chrysler FinCo. Pursuant to a termination agreement dated 5/14/2010, Treasury agreed to accept a settlement payment of \$1.9 billion as satisfaction in full of all existing debt obligations (including additional notes and accrued and unpaid interest) of Chrysler Holdco, and upon receipt of such payment to terminate all such obligations.
21. Amount of the Treasury investment after exchange includes the exercised warrants from Treasury's initial investment.
22. Under the terms of an agreement dated 12/30/2009, the convertible preferred shares will mandatorily convert to common stock under the conditions and the conversion price as set forth in the terms of the agreement.
23. On April 30, 2010, the Plan of Liquidation for the debtors of Old Chrysler approved by the respective bankruptcy court became effective (the "Liquidation Plan"). Under the Liquidation Plan, the loan Treasury had provided to Old Chrysler was extinguished without repayment, and all assets of Old Chrysler were transferred to a liquidation trust. Treasury retained the right to recover the proceeds from the liquidation from time to time of the specified collateral security attached to such loan.

1/ The loan was funded through GM Supplier Receivables, LLC, a special purpose vehicle created by General Motors Corporation. The amount of \$3,500,000,000 represents the maximum loan amount. The loan will be incrementally funded. The credit agreement was fully executed on 4/9/2009, but was made effective as of 4/3/2009. General Motors Company assumed GM Supplier

2/ The loan was funded through Chrysler Receivables SPV LLC, a special purpose vehicle created by Chrysler LLC. The amount of \$1,500,000,000 represents the maximum loan amount. The loan will be incrementally funded. The credit agreement was fully executed on 4/9/2009, but was made effective as of 4/7/2009. Chrysler Group LLC assumed Chrysler Receivables SPV LLC on

3/ Treasury issued notice to the institution of the permanent reduced commitment on 7/8/2009; the reduction was effective on 7/1/2009.

4/ Does not include accrued and unpaid interest due on the amount of principal repayment, which interest must be paid at the time of principal repayment.

5/ All outstanding principal drawn under the credit agreement was repaid.

6/ Treasury's commitment was \$2.5 billion (see note 3). As of 4/5/2009, Treasury's commitment to lend under the credit agreement had terminated and the borrower has paid its obligations with respect to the Additional Note. The final investment amount reflects the total funds disbursed under the loan, all of which have been repaid.

7/ Treasury's commitment was \$1 billion (see note 3). As of 4/7/2009, Treasury's commitment to lend under the credit agreement had terminated and the borrower has paid its obligations with respect to the Additional Note. The final investment amount reflects the total funds disbursed under the loan, all of which have been repaid.

1/ Treasury made three separate investments in Citigroup Inc. ("Citigroup") under CPP, TIP, and AGP for a total of \$49 billion. On 6/9/2009, Treasury entered into an agreement with Citigroup to exchange all of Treasury's investments. On 7/30/2009, Treasury exchanged all of its Fixed Rate Cumulative Perpetual Preferred Stock, Series I (TIP Shares) "dollar for dollar" for Trust Preferred Securities.

2/ Repayment pursuant to Title VII, Section 7001 of the American Recovery and Reinvestment Act of 2009.

3/ For final disposition of warrants, "R" represents proceeds from a repurchase of warrants by the financial institution, and "A" represents the proceeds to Treasury, before underwriting fees and selling expenses, from a sale by Treasury in a registered public offering of the warrants issued by the financial institution.

1/ In consideration for the guarantee, Treasury received \$4.03 billion of preferred stock, which pays 8% interest.

2/ Treasury made three separate investments in Citigroup Inc. ("Citigroup") under CPP, TIP, and AGP for a total of \$49 billion. On 6/9/2009, Treasury entered into an agreement with Citigroup to exchange all of Treasury's investments. On 7/30/2009, Treasury exchanged all of its Fixed Rate Cumulative Perpetual Preferred Stock Series G (AGP Shares), received as premium with the AGP agreement, "dollar for dollar" for Trust Preferred Securities.

3/ On 12/23/2009, Treasury entered into a Termination Agreement with the other parties to the Master Agreement which served to terminate Treasury's guarantee and obligations under the Master Agreement. In connection with the early termination of the guarantee, Treasury agreed to cancel \$1.8 billion of the AGP Trust Preferred Securities, and the Federal Deposit Insurance Corporation (FDIC) and Treasury agreed that, subject to the conditions set out in the Termination Agreement, the FDIC may transfer \$800 million of Trust Preferred Securities to Treasury at the close of Citigroup's participation in the FDIC's Temporary Liquidity Guarantee Program.

1/ The equity amount may be incrementally funded. Investment amount represents Treasury's maximum obligation if the limited partners other than Treasury fund their maximum equity capital obligations.

2/ The loan may be incrementally funded. Investment amount represents Treasury's maximum obligation if Treasury and the limited partners other than Treasury fund 100% of their maximum equity obligations.

3/ Adjusted to show Treasury's maximum obligations to a fund.

4/ On 1/4/2010, Treasury and the fund manager entered into a Winding-Up and Liquidation Agreement. The adjusted amount shows Treasury's final investments in the fund. (See note 6.)

5/ Profit after capital repayments will be paid pro rata (subject to prior distribution of Contingent Proceeds to Treasury) to the fund's partners, including Treasury, in respect of their membership interests.

6/ Following termination of the TCW fund, the \$3.33 billion of obligations have been reallocated to the remaining eight funds pursuant to consent letters from Treasury dated as of 3/22/2010. \$133 million of maximum equity capital obligation and \$267 million of maximum debt obligation were reallocated per fund, after adjustment for the \$17.6 million and \$26.9 million equity capital reallocations from private investors in the TCW fund to the Wellington fund and the AG GECC fund, respectively. The \$356 million of final investment in the TCW fund will remain a part of Treasury's total maximum S-PPIP investment amount.

Total Initial Cap

\$ 23,761,990,000

Total Cap Adjustments

\$ 16,062,028,890

TOTAL CAP

\$ 39,824,018,890

1/ The Cap of Incentive Payments represents the potential total amount allocated to each servicer and includes the maximum amount allotted for all payments on behalf of borrowers and payments to servicers and lenders/investors.

The Cap is subject to adjustment based on the total amount allocated to the program and individual servicer usage for borrower modifications. Each adjustment to the Cap is reflected under Adjustment Details.

2/ On July 31, 2009, the SPA with Chase Home Finance, LLC was terminated and superseded by new SPAs with J.P. Morgan Chase Bank, NA and EMC Mortgage Corporation.

3/ Wachovia Mortgage, FSB was merged with Wells Fargo Bank, NA, and the remaining Adjusted Cap stated above represents the amount previously paid to Wachovia Mortgage, FSB prior to such merger.

4/ Initial cap amount only includes FHA-HAMP.

5/ On 6/17/2010, Selene Financial, L.P. executed an Assignment and Assumption Agreement with CitiMortgage, Inc. (a copy of which is available on www.FinancialStability.gov) with respect to all rights and obligations for the transferred loan modifications. The amount transferred is realized as a cap adjustment and not as initial cap for Selene Financial, L.P.

As used in this table:

"HAFA" means the Home Affordable foreclosure Alternatives program.

"HPDP" means the Home Price Decline Protection program.

"2MP" means the Second Lien Modification Program.

* Subject to adjustment

1/ The amortizing principal and interest payments are reported on the monthly Dividends and Interest Report available at www.FinancialStability.gov.

2/ Investment Amount is stated after giving effect to factor and, if applicable, the purchase of accrued principal and interest.

3/ If a purchase is listed as TBA, or To-Be-Announced, the underlying loans in the SBA Pool have yet to come to market, and the TBA pricing mechanism, purchase face amount, investment amount and senior security proceeds will be adjusted within the variance permitted under the program terms. If a purchase is listed as PMF, or Prior-Month-Factor, the trade was made prior to the applicable month's factor being published and the SBA 7a security and senior security are priced according to the prior-month's factor. The PMF investment amount and senior security proceeds will be adjusted after publication of the applicable month's factor (on or about the 11th business day of each month).

4/ In order to satisfy the requirements under Section 113 of the Emergency Economic Stabilization Act of 2008, Treasury will acquire a senior indebtedness instrument (a Senior Security) from the seller of each respective SBA 7a Security. Each Senior Security will (i) have an aggregate principal amount equal to the product of (A) 0.05% and (B) the Investment Amount (excluding accrued interest) paid by Treasury for the respective SBA 7a Security, and (ii) at the option of the respective seller, may be redeemed at par value immediately upon issuance, or remain outstanding with the terms and conditions as set forth in the Master Purchase Agreement.

5/ Disposition Amount is stated after giving effect, if applicable, to sale of accrued principal and interest.
