1. Certification of Results

This report was prepared on behalf of the Road Carriers Local 707 Pension Plan based on employee data, asset statements and plan documents provided by the Plan Sponsor or its representatives. We relied upon the data as submitted, without formal audit. However, the data was tested for reasonableness, and we have no reason to believe that any other information which would have had a material effect on the results of this valuation was overlooked.

Therefore, to the best of our knowledge and belief, the information presented in this report is complete and accurate, and in our opinion, each assumption used represents our best estimate of anticipated experience under the Plan.

2. Highlights

1. Long-Term Funding

Projected annual contributions of \$5.74 million (\$3.523 per hour) plus the annuitized value of withdrawal liability payments of \$0.81 million (\$0.50 per hour) fall short of the total annual cost of benefits of \$63.83 million (\$39.18 per hour). This leaves a negative margin of \$57.29 million or \$35.16 per hour. Therefore, the Plan is underfunded and its finances will need adjustment to ultimately fund all benefit promises.

2. Margin

The margin has decreased from (\$34.19) last year to (\$35.16) this year primarily due to the effect of the passage of time and spreading the value of expected withdrawal payments over 15 years. Margin is explained in Section 4 of this report.

3. Pension Protection Act

As of January 31, 2015, the Plan's funding percentage is 9.4%. This is below 65% and, together with the Plan's negative credit balance, the Plan remains in Critical Status as of February 1, 2015.

In addition to being in Critical Status on February 1, 2015, the Plan is projected to become insolvent within the current or next 19 years and its ratio of inactive to active participants is in excess of 2 to 1. Therefore, as of February 1, 2015, the Plan is in Critical and Declining Status.

The Trustees have adopted a "reasonable measures" Rehabilitation Plan which is fully detailed in section 4.8 of this report.

Without any benefit changes or financial assistance, the Plan is projected to go insolvent in August of 2016.

3. Summary of Key Funding Measures

a Interest rate per annum	5.75%	5.75%
b Hours	1,629,375	1,629,375

4. Plan Cost

4.1 Annual Plan Cost and Margin

There are two component costs to funding a pension plan: the cost of benefits earned in the year and the amortization of the unfunded liability. The sum of the two costs expressed in dollars per hour of covered work provides a useful way of expressing the Plan's actuarial cost.

In the context above, margin is the amount, in contributions per hour, by which the anticipated contributions differ from the Plan's projected actuarial cost.

The costs below are calculated consistent with a funding policy of paying off the unfunded liability over 15 years assuming asset returns of 5.75% annually. The margin, found on Line C below, is negative and indicates that the Plan needs an additional \$35.16 per hour to pay for all future benefits.

There are many actuarial measures and statistics to measure the state of the Plan's funding. The margin is designed to provide a single simplified statistic for a Trustee to get a sense for the Plan's level of funding. As long as the margin is positive, it is a strong indication that the current benefits are affordable on a long-term basis. If negative, it is an indication that the overall funding may need to be improved before benefits are affordable.

	<u>Per Year</u>	<u>Dollars per Hour</u>	<u>As a % of Contributions</u>
A. Contributions			
1. Anticipated annual contributions	\$ 5,740,614	\$ 3.52320	100.0%
2. Withdrawal Liability Payments	<u>811,500</u>	<u>0.50000</u>	<u>14.2%</u>
3. Total (1 + 2)	\$6,552,114	\$ 4.02320	114.2%
B. Actuarial Costs			
1. Cost of benefits earned in the year	\$ 4,460,655	\$2.74	77.8%
2. Amortization of unfunded liability	<u>59,377,479</u>	<u>36.44</u>	<u>1034.3%</u>
3. Total annual costs (1+2)	\$ 63,838,134	\$39.18	1112.1%
C. Margin (A3-B3)	\$(57,286,020)	\$(35.16)	-997.9%
D. Years to Full Funding	Does not fund		

4.2 Summary of Contribution Deferral Arrangement (CDA)

	<u>Time Frame</u>
Delinquent Months	3/1/2009 - 06/30/2009
Original CDA Period	7/1/2009 - 12/31/2010
Revised CDA Period	7/1/2009 - 06/01/2011

Restructuring Agreement under the Memorandum of Understanding (MOU):

For most of the Fund's history, the General Freight Rate was the rate paid by the majority of its employers. Effective 7/1/2009, YRC Worldwide (YRC) and the Board of Trustees entered into the CDA as part of the MOU, temporarily suspending YRC's requirement to remit contributions to the Fund. During this suspension, YRC's employees did not earn service for benefits or eligibility.

Initially, the MOU was to expire 12/31/2010. It was later extended to 5/31/2011. Because the Fund is in the Red Zone and its Rehabilitation Period did not start until 9/1/2011, the Fund did not accept the reduced contributions until that date, putting the contributions from 6/1/2011 through 8/31/2011 in escrow. As of 6/1/2011, YRC employees began receiving service for eligibility purposes, and as of 9/1/2011, they began receiving service for the purpose of accruing benefits.

Pursuant to the revised MOU, YRC's hourly contribution rate upon its re-entry into the Fund was at 25% of the rate in effect as of 7/1/2009, or $\$7.295 \times 25\% = \1.8238 . This rate will remain in effect until 3/31/2015. It is expected that the contribution rate for YRC will increase \$0.25 per hour as of 8/1/2015.

4.3 Derivation of Projected Annual Contributions

As of 1/31/2015

	<u>Actives</u>	<u>Avg. hourly contribution rate</u>
A. YRCW	584	\$1.9489
B. Other	<u>167</u>	<u>8.59</u>
C. Total	751	\$3.5232

D. Projected Hours	1,629,375
E. Contribution Rate	<u>\$3.5232</u>
F. Contributions	\$5,740,614

4.4 Margin Detail

A. As of	<u>1/31/2015</u>		
1. Actuarial liability	\$664,260,744		
2. Actuarial value of assets	<u>62,740,112</u>		
3. Unfunded actuarial liability (1-2)	\$601,520,632		
4. Normal cost	\$ 2,978,156

Gain/loss analysis is one of the most important tools available to an actuary to ensure that their model of the Plan's funding is accurate. The exhibit above shows the total gain/(loss) broken down into three components: assets, administrative expense and demographic assumptions.

The gain on assets is very unpredictable due to the unpredictable returns on the market value of assets. Moreover, the gain/(loss) on assets is greatly influenced by the smoothing method. The pattern of asset gains is discussed later in this report.

After itemizing the gain/(loss) on assets and administrative expenses, what remains is the gain/loss on all the other demographic assumptions including retirement, turnover, disability, and mortality rates. Over time, to remain confident in the future funding, it is important that the gains and losses on the demographic assumptions average zero, or at least a relatively small number.

Over the past six years the Fund has experienced gains and losses. We have updated the mortality table this year. We will continue to monitor this experience and recommend further assumption changes as necessary.

4.7.2 Asset Information

For Plan Years Ending August 31 through 2014 and January 31 thereafter

	Market Value of Assets	Contributions	Withdrawal Payments	Benefits	Expenses	Market Investment Income	Rates of Return		
							At Market	At Actuarial	
2001	\$372,514,742	\$14,257,063		\$(27,824,987)	\$(1,563,574)	\$(53,352,504)	-12.3%	-12.3%

Totals		\$149,367,854	\$19,968,498	(588,338,289)	\$(19,318,944)	\$64,763,581			
							5-year average	9.0%	3.5%
							10-year average	4.8%	3.0%
							15-year average	3.5%	2.3%

The Plan's return on the market value of assets in the Plan Year ending 1/31/2015 was 0.5%. The return on the actuarial value of assets was greater due to the continued recognition of the asset gains in the Plan Years ending 8/31/2011 through 8/31/2014.

4.7.3 Employment

Plan Years Ending <u>August 31</u>	Contribution <u>Income*</u>	Average Contribution <u>Rate (t)</u>	Employment Hours for <u>Valuation**</u>
2005	14,367,494	4.86586	2,952,714
2006	15,181,537	5.44976	2,785,726
2007	15,976,404	6.01783	2,654,845
2008	15,498,778	6.44241	2,405,742
2009	13,905,655	5.95461	2,335,276
2010	N/A	N/A	N/A
2011	N/A	N/A	N/A
2012	5,659,922	3.11134	1,819,127
2013	5,676,206	3.31652	1,711,495
2014	5,655,782	3.15040	1,795,258
Short Plan Year <u>January 31</u>			
2015	\$2,316,961	\$3.20906	722,006

The employment assumption included in the valuation is 1,629,375 hours annually. The annualized hours for the short Plan Year ending 1/31/2015 would be 1,732,814.

We are projecting future income based upon total hours and an average contribution rate of \$3.20906 per hour. Prior to 2010, we used the General Freight contribution rate as the average contribution rate and imputed the annual hours worked at 1,875 per year. In light of the Memorandum of Understanding with YRC Worldwide, we are no longer using the General Freight rate as our average rate.

* Due to the effects of the Memorandum of Understanding with YRC Worldwide, the contribution income for the Plan Years ending 8/31/2010 and 8/31/2011 contain large receivables, and we cannot accurately estimate the hours worked in those years.

**Total hours for the valuation is derived by dividing actual contributions by last year's projected contribution rate, and will not necessarily match reported hours by the Fund Office.

4.7.4 Funded Ratio

Plan Years Ending Aug. 31	Market Value of Assets	Present Value of Accrued Benefits	Funded Ratio
1998	\$ 353,242,851	\$ 316,477,698	111.6%
1999	394,239,218	396,192,285	99.5%
2000	440,998,744	439,651,402	100.3%
2001	372,514,742	458,385,281	81.3%
2002	319,745,591	485,007,058	65.9%
2003	328,676,773	501,842,484	65.5%
2004	323,730,056	522,522,717	62.0%
2005	331,195,457	532,601,507	62.2%
2006	319,887,873	543,481,542	58.9%
2007	332,705,704	554,659,617	60.0%
2008	290,218,447	562,895,822	51.6%
2009	222,586,220	549,978,255	40.5%
2010	188,484,239	568,122,700	33.2%
2011	169,026,779	634,735,046	26.6%
2012	143,812,623	634,318,582	22.7%
2013	115,338,672	676,414,928	17.1%
2014	\$86,343,675	\$670,905,944	12.9%
Jan. 31 2015	\$67,441,444	\$664,260,744	10.2%

The Funded Ratio is a statistic commonly followed by Trustees. It provides an alternative measure of the Plan's current level of funding. The Funding Ratio compares the market value of assets to the value of benefits accrued as of the valuation date. Based on the market value of assets of \$67,441,444 and the total value of accumulated benefits of \$664,260,744 the Funded Ratio is 10.2% as of January 31, 2015. The funded ratio under the PPA, which uses the actuarial value of assets, is 9.5%.

The fact that the Funded Ratio is under 100% means that there are unfunded accumulated benefits when valuing the Plan on an ongoing basis. It does not necessarily imply that the Plan is underfunded on a long term basis because it makes no consideration of future contributions relative to future costs. The Margin is the best single statistic to get a sense of how well funded the Plan is on a long term basis.

Moreover, the Funding Ratio is not a measure of funding on a Plan-termination basis. That would require a different interest assumption.

4.7.5 Actuarial Value of Assets Expressed as a % of Market Value

Plan Years Ending <u>Aug. 31</u>	Actuarial Value of <u>Assets</u>	Actuarial Assets as a Percent <u>Of Market</u>
1998	\$ 353,242,851	100.0%
1999	394,239,218	100.0%
2000	440,998,744	100.0%
2001	372,514,742	100.0%
2002	383,694,709	120.0%
2003	388,466,303	118.2%
2004	365,353,230	112.9%
2005	336,739,925	101.7%
2006	324,028,675	101.3%
2007	325,433,208	97.8%
2008	318,671,200	109.8%
2009	267,103,464	120.0%
2010	226,181,087	120.0%
2011	188,038,383	111.2%
2012	152,231,761	105.9%
2013	114,727,566	99.5%
2014	\$75,382,811	87.3%
<u>Jan. 31</u> 2015	\$62,740,112	93.0%

The three primary measures that help an actuary assess how well funded a Trust is on a long-term basis are:

1. Margin,
2. Gain/loss analysis and an assessment of assumptions, and
3. Spread, defined as the difference between the market and actuarial value of assets expressed as a percentage of the market value of assets.

The Margin and assumptions were covered in earlier sections.

The third factor is the Spread statistic. When positive it represents a cushion to help offset potential future unfavorable investment experience. Conversely, when the actuarial value is greater than the market value the Spread turns negative. When this is the case future investment returns over and above the assumed return are necessary over time to restore the market value of assets equal to the actuarial value.

Currently the Spread is 7.0%.

4.8 Pension Protection Act – Rehabilitation Plan

The Plan continues to be in the Red Zone as of February 1, 2015 because it has a funding deficiency. Moreover, the Plan is in Critical and Declining Status (a Red Zone category) as of 2/1/2015 due to the following:

- The Plan meets the criteria for Critical Status, and
- The Plan is projected to become insolvent in the current or next 19 years and
- The Plan's ratio of inactive to active participants is in excess of 2 to 1.

The Trustees have implemented a Rehabilitation Plan (RP) as per the PPA. The Rehabilitation Plan (Non-Default Schedule) is as follows:

Zone Certification History

<u>As of 8/31</u>	<u>Zone</u>
2008-2014	Red

<u>As of 1/31</u>	<u>Zone</u>
2015	Red (Critical and Declining)

Key Dates

Initial Critical Zone Certification:	September 1, 2008
Adoption Period:	11/30/2008 – 8/31/2011
WRERA Election Date:	October 30, 2009
Rehabilitation Period:	9/1/2011 – 1/31/2025

Contribution Increases and Future Benefit Accruals

Compliance with the Non-Default Schedule requires the Contributing Employer's contribution rate to increase effective August 1, 2008, and increasing August 1st annually thereafter.

Future benefit accruals for the Normal Retirement Pension will be 0.6% of the Employer Contribution required to be made on behalf of the Participant for the first year the Non-Default Schedule is in place and the rate of future benefit accrual will be adjusted in the following years to provide a 4% annual benefit increase until the maximum benefit of \$115 is reached. This adjustment will be effective annually on January 1. The previous cap on a Contributing Employer's contribution rate (i.e., \$4.3975 per hour or, if lower, the rate in effect on December 31, 2004) is eliminated.

Contribution increases and accrual rates are scheduled as follows:

<u>Year</u>	<u>Contribution Increase</u>	<u>Accrual Rate</u>
August 1, 2008	10.614%	0.6000%
August 1, 2009	9.596%	0.5694%
August 1, 2010	8.755%	0.5445%
August 1, 2011	8.051%	0.5241%
August 1, 2012	7.451%	0.5072%
August 1, 2013	5.944%	0.4979%
August 1, 2014	5.610%	0.4903%
August 1, 2015	5.312%	0.4842%
August 1, 2016	5.044%	0.4610%
August 1, 2017	4.802%	0.4399%

Adjustable Benefits Reduced

1. A Service Pension is available to Participants with at least 25 Pension Credits who have attained age 57 or to Participants with 30 Pension Credits at any age. The amount of the Service Pension is an unreduced Normal Retirement Pension. The Service Pension replaces the Twenty-Five Year Service Pension.
2. A reduced Service Pension is available to Participants with at least 25 Pension Credits who have not yet attained age 57. In this case, the amount of the reduced Service Pension is the Normal Retirement Pension reduced by 0.5% for each whole calendar month by which the commencement of benefits precedes the first day of the month coinciding with or next following the date the Participant attains age 57.
3. The Supplemental Pension Benefit is available to Participants with at least 25 Pension Credits who have attained age 57 or Participants with 30 Pension Credits at any age, where at least 18 Pension Credits are attributable to service under the Plan.

Adjustable Benefits Eliminated

- Disability Pension
- Supplemental Lump Sum Post-Retirement Death Benefit
- Thirty-Year Service Lump Sum Post-Retirement Death Benefit
- 5-Year Period Certain Life Annuity

The WRERA election extended the Rehabilitation Period from ten years to thirteen years, and froze the Plan's Zone Status (required no update to the Rehabilitation Plan) for the Plan Year ending August 31, 2010.

Since the fourth quarter of 2008, the severe economic downturn has created a tremendous funding burden related to the loss in asset value and reduction in employment. As a result, the plan sponsor determined that, based on reasonable actuarial assumptions and upon exhaustion of all reasonable measures, the plan cannot reasonably be expected to emerge from critical status by the end of the rehabilitation period, or any later period. As a result the Rehabilitation Plan is not being updated, as allowed by IRC §432(e)(3)(A)(ii).

The following chart projects the funded percentage future assuming that there are no gains or losses on demographic assumptions and that the market value of assets returns the assumed rate of 5.75%. The chart shows the Plan going insolvent before January 31, 2017.

5. ASC No. 960 Disclosures

5.1 Present Value of Accumulated Plan Benefits

As of January 31, 2015

A. Present Value of Vested Benefits:

1. Participants currently receiving payments	\$ 462,486,749
2. Other vested benefits	<u>189,088,445</u>
3. Subtotal vested benefits	\$ 651,575,194

B. Present Value of Non-Vested Benefits 12,685,550

C. Present Value of Accumulated Benefits (A+B) \$ 664,260,744

The ASC No. 960 values were computed using the same assumptions as those used for determining funding requirements.

5.2 Reconciliation of Changes in Present Value of Accumulated Benefits

A. Present Value of Accumulated Benefits at Prior Valuation Date \$ 670,905,944

B. Changes During the Year Due to:

1. Benefits accumulated and net gains	(22,735,703)
2. Benefits paid	(21,910,307)
3. Assumption changes	(576,282)
4. Method changes	0
5. Plan amendments	0
6. Passage of time	<u>38,577,092</u>
7. Total change	\$ (6,645,200)

C. Present Value of Accumulated Benefits at Current Valuation Date \$ 664,260,744

6. Government Reporting

6.1 Summary of Assumptions

These are the assumptions used for the ongoing valuation calculations, unless otherwise noted.

**Road Carriers Local 707 Pension Plan
Annual Valuation Report as of 1/31/2015**

Actuarial Value of Assets The market value of assets less unrecognized returns in each of the last four years. Unrecognized return is equal to the difference between the actual market return and the expected return on the market value, and is recognized over a four year period. The actuarial value is further adjusted, if necessary, to be within 20% of the market value.

Actuarial Cost Method Traditional Unit Credit

Assumption Change The expected expenses were increased from \$1,300,000 to \$1,350,000 annually.

RPA '94 Current Liability Assumptions

Interest 3.47%

Mortality

 Healthy Mortality: per IRC §1.430(h)(3)-1
 Disabled Mortality: per IRC §1.430(h)(3)-1

6.2 Recent Plan Changes

The plan was started in 1951 with its finances coming from employer contributions and investment yield on the plan funds. Coverage is afforded participants working in the jurisdiction of Local 707 for employers with collective bargaining agreements providing for pension contributions to the plan.

Effective January 1, 2009:

Change	Interim Plan	Default Plan	Non-Default Plan
Future accruals	0.5% of hourly contributions not to exceed \$4.3975/hour or the rate in effect on 12/31/2004	1% of hourly contributions not to exceed \$4.3975/hour or the rate in effect on 12/31/2004	0.6% of hourly contributions with no cap and decreasing annually. When combined with the required contribution increases, target accruals increase 4% per year until equivalent to \$115 per hour.
Twenty-Five Year Service Pension	No participant will earn benefits towards the Twenty-Five Year Service Pension after 12/31/2008	The Twenty-Five Year Service Pension is eliminated.	Calculated as above. Eligibility for an unreduced benefit is changed to 25 years of service and age 57, or 30 years of service. A reduced Service Pension is available to Participants with at least 25 Pension Credits who have not yet attained age 57. In this case, the amount of the reduced Service Pension is the Normal Retirement Pension reduced by 0.5% for each whole calendar month by which the commencement of benefits precedes the first day of the month coinciding with or next following the date the Participant attains age 65.
Supplemental Pension Benefit	Eliminated for retirements after December 31, 2008	Eliminated for retirements after December 31, 2008	Eligibility for a supplemental pension benefit is changed to 25 years of service and age 57, or 30 years of service where at least 18 Pension Credits are attributable to service under the Plan.
Disability Benefit	Eliminated for retirements after December 31, 2008	Same	Same
Post-Retirement Death Benefit Supplemental Lump Sum	Eliminated after December 31, 2008	Same	Same

**Road Carriers Local 707 Pension Plan
Annual Valuation Report as of 1/31/2015**

Change	Interim Plan	Default Plan	Non-Default Plan
Post-Retirement Death Benefit Thirty-Year Service Lump Sum	Eliminated after December 31, 2008	Same	Same
Subsidized 5-Year Certain & Continuous Benefit	No Change	Eliminated for retirements after December 31, 2008	Eliminated for retirements after December 31, 2008

Effective
1/1/2005

Description
Actives:

1. The benefit accruing after 2004 is changed to 1% of the contributions payable at an hourly rate not exceeding \$4.3975 (or equivalent lesser amounts for employers contributing at less than the General Freight rate).
2. The service pension accruing after 2004 is reduced 1/2% for each month by which commencement precedes age 55.
3. The bridge benefit is changed. Eligibility is 30 years of pension service, or age 55, with 25 years of pension service (formerly 25 years regardless of age). In each case, at least 18 years of the pension service must be service under the plan. The temporary amount payable until age 65 or earlier death is increased from \$100 to \$200 plus \$100 for each full pension credit earned after each January 1st following initial eligibility for the bridge benefit on or after 1/1/2005 provided that the bridge benefit does not thereby exceed the expected Social Security benefit.
4. The five-year guarantee now applies only as an actuarially reduced benefit if elected with spousal consent (subject to grandfathering of the amount accrued as of 12/31/2004). Also, the five-year guarantee on death before retirement no longer applies.
5. For those with at least a quarter-year of pension service after 12/31/2004 there are revised actuarial equivalencies and additional 50% and 100% H&W options incorporating a pop-up feature that restores the benefit to the single-life amount if the spouse dies first. The 50% H&W with pop-up is subject to spousal consent.

2001

Actives:

Among the changes were:

- a. participation on January 1 after a calendar year in which 250 hours of service were earned in covered employment (retroactive to 9/1/99),
- b. an option at retirement to elect a joint and 100% form of benefit to protect a spouse (effective 5/1/01), and
- c. elimination of the one year of marriage requirement for payment in joint and survivor form if retiring.

7/1/2000

Actives:

The benefit unit has been increased to \$115 per year of pension service.

9/1/1999

Actives:

1. The service requirement for vesting is reduced to five years of vesting service.
2. A pension increase of \$100/month payable only until age 65 applies for those retiring with 25 years of pension service.

**Road Carriers Local 707 Pension Plan
Annual Valuation Report as of 1/31/2015**

Effective Description
4/1/1999 Actives:

The following increase has been adopted for active participants who have contributions made on their behalf at the National Master Freight rate of contributions (reduced benefits apply where contributions are made at a lower rate):

The amount of the monthly 25 Year Service Pension has been increased to \$2,000. (\$2,500. for those age 55 or over) plus \$100 for each year of Pension Service in excess of 25 years.

7/1/1998 Pensioners:

The Trustees approved a \$500 one-time check to those receiving a monthly pension check of less than \$500, and a \$1,000 one-time check to those receiving a monthly pension check of \$500 or more.

4/1/1998 Actives:

The following increases have been adopted for active participants who have contributions made on their behalf at the National Master Freight rate of contributions (reduced benefits apply where contributions are made at a lower rate):

- a. The amount of the Regular Pension has been increased to \$100 per year of pension service
- b. The amount of the monthly 25 Year Service Pension has been increased to \$1,800
- c. The 30 Year Service Pension has been increased to \$100 for each year of pension service

9/1/1997 Actives:

The following increases have been adopted for active participants who have contributions made on their behalf at the National Master Freight rate of contributions (reduced benefits apply where contributions are made at a lower rate):

- a. The amount of the Regular Pension has been increased to \$89.16 per year of pension service
- b. The amount of the monthly 25 Year Service Pension has been increased to \$1,600
- c. The 30 Year Service Pension has been increased to \$89.16 for each year of pension service

4/1/1996 Pensioners:

The Trustees provided an overall 3.5% increase to the pensioners which was allocated to each pensioner based on the years each pensioner has been receiving a pension benefit.

----------	----------

The following increases have been adopted for active participants who have contributions made on their behalf at the National Master Freight rate of contributions (reduced benefits apply where contributions are made at a lower rate):

- a. The amount of the Regular Pension has been increased to \$66.67 per year of pension service
- b. The amount of the monthly 25 Year Service Pension has been increased to \$1,200
- c. The 30 Year Service Pension has been increased to \$66.67 for each year of pension service

6.3 Summary of Plan Provisions

These provisions are for participants of employers who contribute at the National Master Freight Agreement rate of contribution. The summary plan description should be reviewed for plan provisions in effect for other contribution rates.

Plan Year:	February 1 through January 31.
Participant	Entry date on January 1st following completion of 250 hours of service in covered employment in a calendar year.
Vesting Service	
<u>Time Period</u>	<u>Vesting Service Earned</u>
Before 8/1/1976	One year for each plan year in which at least 1,000 hours of service were completed.
8/1/1976 and After	One for each plan year in which at least 1,000 hours of service or related service were completed.
Pension Credit	
<u>Time Period</u>	<u>Pension Credit Earned</u>
9/1/1950 to 7/31/1954	1/4 of a year for each plan year quarter in which the employer was required to contribute for at least 36 days worked.
8/1/1954 to 7/31/1976	1/4 of a year for each plan year quarter in which the employer was required to contribute for at least 25 days worked.
8/1/1976 to 7/31/1982	1/4 of a year for each 250 hours of service in a plan year, up to one year.
8/1/1982 to 12/1/1982	1/4 of a year for each 200 hours of service in a plan year, up to a half year.
1/1/1983 and After	1/4 of a year for each 250 hours of service in a plan year, up to one year.
Vesting	100% after 5 years of Vesting Service.
Break Year	<p>A break year is a year in which fewer than 250 hours of service are credited. A non-vested participant who incurs a break year forfeits participation and service (subject to ERISA restoration rights).</p> <p>A permanent break in service is after consecutive break years that equal the greater of five years or the years of Vesting Service before the first of those break years. Service earned previously can then be restored only if the participant subsequently earns ten consecutive years of Pension Credit under only the Local 707 Pension Plan.</p> <p>The benefit unit is "frozen" after a break year for his pre-break Pension Credit until the participant earns more Pension Credit under only the Local 707 Pension Plan than his break years. However, if the participant first incurs a permanent break in service the benefit unit is "frozen" until he subsequently earns ten consecutive years of Pension Credit under only the Local 707 Pension Plan.</p>

Normal Retirement Pension:

Eligibility Age 65 with 5 years of plan participation.

Amount As accrued through 12/31/2008 plus 0.6% of hourly contributions with no cap and decreasing annually. When combined with the required contribution increases, target accruals increase 4% per year until equivalent to \$115 per hour as follows:

Eff. <u>Jan. 1</u>	Accrual <u>Rate</u>
2009	0.6000%
2010	0.5694%
2011	0.5445%
2012	0.5241%
2013	0.5072%
2014	0.4979%
2015	0.4903%
2016	0.4842%
2017	0.4610%
2018	0.4399%

Normal Form Life only

Early Pension:

Eligibility Age 55 with 15 years of Pension Credit. Must have at least two quarters under Local 707.

Amount Normal Retirement Pension benefit reduced 1/2 of 1% for each month prior to Regular Pension date.

Service Pension:

Eligibility 25 Pension Credits who have attained age 57 or Participants with 30 Pension Credits at any age.

Amount Normal Retirement Pension benefit unreduced at age 57. Reduced by 1/2% for each month by which retirement precedes age 57.

Bridge Benefit:

Eligibility Must meet one of the two rules below:

- 30 years of Pension Credit
- Age 57 and 25 years of Pension Credit

At least 18 years of service must be under Local 707.

Amount \$200 plus \$100 for each full year of pension service after the later of eligibility or 1/1/2005. Payable until age 65 or death if earlier.

Disability:

Eligibility Eliminated as of 1/1/2009 pursuant to Rehabilitation Plan.

Vested Pension:

Eligibility 5 years of vesting service.

Amount Normal Retirement Pension deferred to Normal Retirement Pension age.

Pre-Pension Surviving Spouse Pension:

Eligibility Vested and married for one year at death.

Amount 50% of the benefit the participant would have received had he or she retired the day before he or she died and elected the joint and 50% survivor option. If the participant died prior to eligibility for an early retirement pension, the spouse's benefit is deferred to the participant's earliest retirement date.

Post-Pension \$10,000 Death Benefit:

Eligibility Eliminated as of 1/1/2009 pursuant to Rehabilitation Plan.

Post-Pension \$2,500 Death Benefit:

Eligibility Eliminated as of 1/1/2009 pursuant to Rehabilitation Plan.

Grandfathering:

A participant with pension service earned after 2004 has all optional forms reduced for actuarial equivalence using 7% interest and unisex mortality as in Revenue Ruling 95-6 (except lump sums calculated on the Code Section 417(e)(3) basis). In no event is the optional form less than that calculated as of 1/1/05.

A participant who has no pension service earned after 2004 has husband and wife options calculated using the formula stated in the plan document.

Optional Forms of Benefit:

The following optional forms of benefit are actuarial equivalent to the normal form of benefit

- 50% J&S
- 50% J&S with "Pop-Up"
- 75% J&S
- 75% J&S with "Pop-Up"
- 100% J&S
- 100% J&S with "Pop-Up"

6.4 Contribution Rate History

<u>Effective August 1</u>	<u>General Freight Rate</u>
2001	\$ 3.7975
2002	3.7975
2003	4.3975
2004	4.9975
2005	5.5975
2006	6.1975
2007	6.5950
2008	7.2950
2009	7.9450
2010	8.6950
2011	9.3450
2012	9.9950
2013	10.6450
2014	11.1800
2015*	11.7700

* *ABF Freight has requested an increase of \$0.25 per hour rather than the Master Freight increase of \$0.59. It is our understanding this has been granted, and the expected contribution rates in this report reflect that increase.*

6.5 Funding Standard Account and Minimum Required Contributions

Rules for determining minimum required and maximum deductible contributions are set forth in IRC Sections 431 and 404, respectively. Since deductibility may be affected by factors not considered here, the deductibility and timing of contributions should be reviewed with tax counsel.

	<u>Actual</u>	<u>Projected</u>
For Plan Year ending:	<u>1/31/2015</u>	<u>1/31/2016</u>
Charges to the FSA:		
a. Funding deficiency	\$177,694,833	\$ 201,534,033
b. Normal cost	1,798,355	4,328,156
c. Amortization charges	25,003,463	60,090,161
d. Interest on a, b and c	<u>\$4,899,399</u>	<u>\$ 15,292,260</u>
e. Total charges	\$209,396,050	\$281,244,610
Credits to FSA:		
f. Credit Balance at beginning of year	\$0	\$0
g. Employer contributions	3,274,848	8,039,543
h. Amortization credits	4,396,404	9,336,368
i. Interest on above	<u>\$190,765</u>	<u>\$746,578</u>
j. Total credits	\$7,862,017	\$18,122,489
Credit Balance at end of Year	\$(201,534,033)	\$(263,122,121)
Minimum Required Contribution (e - (f + h) x (1.0575))	\$204,894,315	\$271,371,401
Minimum Without Regard to the Credit Balance (e - h x (1.0575))	\$204,894,315	\$271,371,401

A Plan's Credit Balance represents a cumulative measure of all prior contributions (since the initial ERISA effective date) against all prior minimum requirements. If cumulative contributions exceed cumulative minimums, then the Funding Standard Account will maintain a Credit Balance which can be used to offset any current year minimum requirements. As of January 31, 2015, the Plan has a negative Credit Balance (Funding Deficiency) of \$(201,534,033). The minimum requirement for the year ending January 31, 2016 is \$271,371,401.

6.6 Maximum Deductible Contribution

A. Traditional Maximum Deductible	\$ 85,339,150
B. 140% of Projected RPA Current Liability, less Actuarial Value of Assets	1,201,758,979
C. Minimum Required Contribution	<u>271,371,401</u>
D. Greatest of A, B, or C	\$ 1,201,758,979

The maximum allowable deduction for the fiscal year ending January 31, 2016 is \$1,201,758,979. To be deductible for a given fiscal year, a contribution should be made by the time the tax return for that fiscal year is filed with the IRS (including extensions). Specific advice on the deductibility of contributions and timing should be reviewed with your tax counsel.

6.7 Current Liability at Beginning of Plan Year

Current liability is the present value of accrued benefits under the Plan using actuarial assumptions as prescribed by the Retirement Protection Act of 1994 (RPA '94). The liability is determined using the same assumptions used to determine the Plan's funding requirements, except for the interest rate and mortality table. These values are used for specific, prescribed purposes.

RPA '94 Current Liability:

A. Assumptions		
1. Interest rate		3.47%
2. Mortality table		per IRC §1.430(h)(3)-1
 B. RPA '94 Current Liability	<u>Vested Benefits</u>	<u>Total Benefits</u>
1. Retirees and beneficiaries receiving payments	\$585,668,370	\$585,668,370
2. Inactive vested participants	100,436,232	100,436,232
3. Actives	<u>178,717,527</u>	<u>196,394,544</u>
4. Total	\$864,822,129	\$882,499,146
 C. Expected Increase in Liability		\$4,206,892
D. Expected Benefits to be Paid During the Year		\$49,645,538

6.8 Amortization Schedule for Minimum Required Contribution

Amortization Charges as of February 1, 2015

Date Established:		Outstanding	Years	Amortization
<u>Sept. 1</u>	<u>Base Type</u>	<u>Balance</u>	<u>Remaining</u>	<u>Amount</u>
1990	Combined Bases	\$26,696,374	4.583	\$6,421,626
