Shoreline oiled, miles data from U.S. Coast Guard.* Miles per parish represents maximum oiling since onset of Shoreline Cleanup and Assessment Technique (SCAT) activities up to July 6, 2012.

**Treasury believes that the SCAT data are appropriate for determining the share of each Louisiana parish under the relevant standards of the Direct Component in the Act. Treasury takes no position on the data that may be appropriate for other uses in connection with ongoing litigation or natural resource damage assessments.*
